### **General Information**

#### Organisation

DNCA INVEST (the "Fund") is an investment company organised as a *société anonyme* under the laws of the Grand-Duchy of Luxembourg and qualifies as a *société d'investissement à capital variable* (SICAV).

The Fund was incorporated in Luxembourg under the name of LEONARDO INVEST on February 12, 2007 for an unlimited period with an initial share capital of EUR 31,000. Its Articles of Incorporation have been published in the *Mémorial C, Recueil des Sociétés et Associations* (the "*Mémorial*") on March 26, 2007. The Articles of Incorporation of the Fund have been amended on March 6, 2007 to change the name of the Fund from LEONARDO INVEST into LEONARDO INVEST FUND. Such amendment has been published in the *Mémorial* on March 26, 2007. The Articles of Incorporation have been amended on 11 August 2007 to change the name of the Fund to LEONARDO INVEST. Such amendment was published in the Mémorial on 19 October 2007. The Articles of Incorporation have been amended on 20 January 2011 to change the name of the Fund to DNCA Invest. Such amendment was published in the Mémorial on February 24, 2011. The Articles of Incorporation have been amended for the last time on June 5, 2019 and were published in the RESA under number RESA\_2019\_156 on July 8, 2019. The Fund is registered with the *Registre de Commerce et des Sociétés* of Luxembourg, under number B 125012.

The minimum capital of the Fund required by Luxembourg law is EUR 1,250,000 to be reached within 6 months from the launch of the Fund.

#### Meetings

The annual general meeting of shareholders shall be held, in accordance with the Luxembourg law, at the registered office of the Fund, or at such other place in the Grand Duchy of Luxembourg as may be specified in the notice of the meeting, at any date and time decided by the Board of Directors but no later than within six (6) months from the end of the previous financial year. The annual general meeting may be held abroad if, in the absolute and final judgment of the Board of Directors, exceptional circumstances so require.

#### **Reports and Accounts**

Annual Reports, including Audited Financial Statements are published within 4 months following the end of the accounting year and unaudited semiannual reports are published within 2 months following the period to which they refer. The annual reports, including financial statements are sent to each registered shareholder at the address shown on the register of shareholders. The first report prepared by the Fund was the unaudited semiannual report dated June 30, 2007. The Fund's accounting year begins on 1 January and ends on 31 December in each year and was prepared for the first time on December 31, 2007.

The reference currency of the Fund is the EUR. The aforesaid reports comprise combined financial statements of the Fund expressed in EUR as well as individual information on each Sub-Fund expressed in the Reference Currency of each Sub-Fund.

#### Documents

Copies of the Articles of Incorporation of the Fund, the current Prospectus and the latest annual report, including audited financial statements may be obtained free of charge during normal office hours at the registered office of the Fund in Luxembourg or on the Investment Manager website: <a href="http://www.dnca-investments.com">www.dnca-investments.com</a>

#### **DNCA INVEST - BEYOND EUROPEAN BOND OPPORTUNITIES\***

#### First-half 2020 recap

Financial markets rallied for the third consecutive month in June, after plunging in March. The various post-lockdown situations seem to indicate that a return to normal is indeed possible. Above all, the markets now appear to state that the "low point" is definitely behind. Even so, the number of new infections continues to rise worldwide. In the euro zone, various governments continue to boost their financial assistance, and central banks confirm that there should be no problem in funding these additional fiscal deficits. On this path to normalisation, euro zone sovereign rates were stable on the whole, with the Bund ending the first half of the year at - 0.45%, and the FTSE MTS Global gaining 1.2%. Investment grade and high yield corporate bonds also staged a comeback. The EuroStoxx 50 NR gained 6.5% on the month. Driven by its credit market exposure, DNCA INVEST - BEYOND EUROPEAN BOND OPPORTUNITIES also continue to rebound (gaining 0.96% in June), and is now back to -4.48% on the year to date, compared to. +1.99% for its benchmark, the FTSE MTS Global with coupons reinvested.

On the first half of the year, DNCA INVEST - BEYOND EUROPEAN BOND OPPORTUNITIES\* turned in the following performances:

- A Shares (EUR): -4.48%
- B Shares (EUR): -4.57%
- I Shares (EUR): -4.22%
- N Shares (EUR): -4.43%

Against +1.99% for its benchmark, the FTSE MTS Global calculated on a reinvested coupons basis.

#### Past performances are not a reliable indicator of future performances.

The main changes made during the semester include the acquisitions of Dufry 2024, Corestate 2023 and Enel Perpetual Call 2023 bonds. Meanwhile, the America Movil CV and the April 2020 Italian inflation-linked bonds were redeemed, and the Iliad 2021 bond was sold.

As of 30 June 2020, the portfolio's interest-bearing cash (including money-market funds) came to +4.89%, and its net asset value to 52.3 million euros.

#### Second-half outlook

No changes are planned to the investment strategy amidst a *very* gradual return to normal, punctuated by fears of new waves of infections and the hope for a treatment and/or a vaccine. Companies are putting out their second-quarter numbers, which, barring surprises, will be the worst in recent peacetime history. But companies, especially those in the portfolio, have done so much to get to the other side of the crisis - helped along by governments and central banks - that we can start to consider what the post-crisis environment will look like. Amidst this backdrop, it is worth continuing to overweight corporate bonds. The sub-fund has increased its corporate debt exposure from 86% at the start of the year to 95% currently.

#### **DNCA INVEST - EUROSE**

#### First-half 2020 recap

Financial markets rallied for the third consecutive month in June, after plunging in March. The various post-lockdown situations seem to indicate that a return to normal is indeed possible. Above all, the markets now appear to state that the "low point" is definitely behind. Even so, the number of new infections continues to rise worldwide. In the euro zone, various governments continue to boost their financial assistance, and central banks confirm that there should be no problem in funding these additional fiscal deficits. On this path to normalisation, euro zone sovereign rates were relatively stable, with the Bund ending the first half at -0.45%. The EuroStoxx 50 NR gained 6.48% on the month but is still down by 12.0% on the year to date.

DNCA INVEST - EUROSE turned in the following performances in the first half:

- I Share (EUR): -9.24%
- A Share (EUR): -9.56%
- B Share (EUR): -9.65%
- B Share (CHF): -9.65%
- AD Share (EUR): -9.89%
- ID Share (EUR): -9.70%
- H-I Share (CHF): -7.59%
- H-A Share (USD): -8.85%
- H-A Share (CHF): -7.88%
- N Share (EUR): -9.34%
- ND Share (EUR): -9.79%

#### DNCA INVEST - EUROSE (continued)

- Q Share (EUR): -9.03%
- I Share (CHF): units absorbed by H-I units (CHF) in May 2020.

Against -0.40% for its composite index of 20% EURO STOXX 50 + 80% FTSE MTS Global calculated on a reinvested dividends and coupons basis.

#### Past performances are not a reliable indicator of future performances.

The top three contributions to performance in the first half of the year were by Sanofi, STMicroelectronics and BNP Paribas shares. The three worst contributions were by Société Générale, Crédit Agricole and Air France-KLM shares.

The main changes made during the first semester included increased exposures to Bouygues and Eutelsat Communications, and investments in BNP Paribas and the Airbus 2021 convertible bonds. Meanwhile, the sub-fund reduced its holdings in STMicroelectronics, sold off Daimler and Air France-KLM, and redeemed the Italian inflation-linked bond on 23 April 2020.

As of 30 June 2020, the portfolio's interest-bearing cash came to +3.09% (including money-market funds), and its net asset value came to 3,295 million euros.

#### Second-half outlook

The investment environment remains characterised by a high level of uncertainty on the pandemic and economic fronts. Granted, the lifting of lockdowns will boost prospects for a rapid recovery in economic activity, but many doubts remain regarding the solvency of economic agents, momentum in investment and consumption, and the return to normal in global trade. On the other hand, extraordinarily accommodative monetary policies are providing a certain measure of visibility for the coming months and allowing financial markets and banks to continue playing their role in financing the economy.

Against this backdrop, the sub-fund is unlikely to make any major changes to its positioning in the coming weeks. In its bond allocation, the portfolio's average maturity is likely to remain short, and its credit quality, high. The equity allocation, which accounts for about one quarter of the portfolio, could be readjusted on the basis of companies' first-half releases, which will be decisive in determining their short- and medium-term outlooks.

#### **DNCA INVEST - EVOLUTIF**

#### First-half 2020 recap

In the second quarter of 2020, French GDP suffered its worst quarterly decline, at almost 14%, since 1968. The Covid-19 pandemic and the resulting lockdowns erased almost 10 years of economic growth in Western Europe. After plunging by almost 40% since the beginning of the year, equity markets began to rally in the second half of March, when they accomplished most of their rebound. After its dizzying drop in the first quarter, followed by an equally steep rebound, the broad European index (Stoxx Europe 600 calculated on reinvested dividends basis) rose more gradually in the second quarter, gaining +6.2% in April, +3.03% in May and +2.85% in June.

Portfolio management was based on an active management of exposure to risky assets. The equity investment ratio was slashed between mid-February and mid-March and raised significantly thereafter. Stock-picking remained defensive, with an overweighting of growth stocks, quality stocks, and techs, styles that paid off during both the market drops and the rally that began in March.

DNCA INVEST - EVOLUTIF achieved the following returns in the first half of the year:

- A Share (EUR): +0.62%
- B Share (EUR): +0.43%
- I Share (EUR): +0.63%
- Q Share (EUR): +1.49%
- AD Share (EUR): +0.62%
- N Share (EUR): +0.81%

Against -6.79% for its composite benchmark consisting of 60% EuroStoxx 50 NR + 30% FTSE MTS EMU GOV 1-3 years + 10% EONIA capitalised calculated on a reinvested dividends and coupons basis.

#### Past performances are not a reliable indicator of future performances.

Apart from the EuroStoxx 50 put options, the main contributors to performance during the first semester were Hellofresh, ASML Holding, CRH, BioMérieux, Worldline, Enel, Ericsson, TeamViewer, and Vivendi.

Alten, Saint-Gobain (sold), Vinci, Thalès (sold), Safran, and Soitec (sold) were among the worst contributors.

The main new holdings include stocks that were big contributors, including TeamViewer, Hellofresh, BioMérieux, Prosus, Teleperformance, Ericsson, Iberdrola, Enel, Robertet. Verallia was also added to the portfolio. Nestlé was added for its defensive character, the quality of its portfolio and management, and its visibility. In addition to the aforementioned sales, Dassault Aviation was also a major divestment.

As of 30 June 2020, the portfolio's cash holdings (including funds assimilated to money-market funds) stood at +3.24% and net asset value at 215 million euros.

#### DNCA INVEST - EVOLUTIF (continued)

#### Second-half outlook

The solid economic figures released since the end of the main lockdowns suggest that the recovery is under way and that, barring a second wave similar in size to the first, economies could regain the path of economic growth in the second half. Central banks support will continue to pay off, particularly in stabilising financing conditions. With this in mind, equities will continue to make up the majority of the asset allocation.

#### **DNCA INVEST - SOUTH EUROPE OPPORTUNITIES**

#### First-half 2020 recap

Southern European markets fell in the first half of 2020, with the Italian (FTSE MIB), Spanish (IBEX), and Portuguese (PSI 20) indices, calculated on a reinvested dividends basis, down by, respectively -16.56%, -22.85% and -15.80%.

DNCA INVEST - SOUTH EUROPE OPPORTUNITIES turned in the following performances in the first half:

- A Shares (EUR): -15.29%
- I Shares (EUR): -14.85%
- B Shares (EUR): -15.46%
- N Shares (EUR): -15.02%

Against -18.93% for its composite benchmark consisting of 55% FTSE MIBN, 40% IBEX 35TR, and 5% PSI 20 calculated on a reinvested dividends basis.

#### Past performances are not a reliable indicator of future performances.

The top contributors included Enel, the diagnostics firm DiaSorin, and the telecom infrastructure operator Cellnex Telecom. The main negative contributors were two banks, Unicredit and Banco Santander, and ENI.

The main changes during the first half were the additions of two utilities, Energias De Portugal and Enagas and the auto equipment-maker CIE Automotive. Meanwhile, ENI, Caixabank and Merlin Properties were taken out of the portfolio. Profits were also taken in reducing exposures to Carel Industries and DiaSorin, with the proceeds used to add to the weightings of more steeply undervalued stocks.

As of 30 June 2020, the portfolio's cash holdings came to +3.57% (after rising as high as 10% at the end of March), and its net asset value came to 112 million euros.

#### Second-half outlook

Southern European markets have been hit hard by the pandemic but should get a boost from massive monetary and fiscal support, along with political stability strengthened by governing coalitions and the emergence of European solidarity that is undermining populist arguments. Valuations are still reasonable in our portfolio's top growth stocks, but the rally rebound could be more pronounced in its most undervalued stocks. The environmental transition is, and will remain, a theme in which the sub-fund is heavily exposed through leaders such as Enel and Iberdrola, as well as small specialised companies, such as Solaria, Falk Renewables, ERG, Hera Group, and Vidrala. Lastly, the current situation favours corporate mergers in southern Europe, after Fiat-Peugeot and Luxottica-Essilor and, more recently, Intesa Sanpaolo-UBI Banca and Hera-Ascopiave.

Our portfolio's asset-picking continues to be guided by in-depth fundamental analysis, the findings of which are verified through regular discussions with the companies' management that include sustainable development challenges. Preference is given to building a portfolio based on strong convictions that is managed actively and diversified through risk-taking, rather than sector-, geographical-, style- or market cap-based bets.

#### **DNCA INVEST - VALUE EUROPE**

#### First-half 2020 recap

The upward market trend of late 2019 spilled over into the first half of January, driven by accommodative central banks, greater visibility on Brexit and the Sino-US trade war, and an improvement in purchasing manager indices worldwide. However, the markets soon ran headlong into the pandemic and its economic fallout. The STOXX Europe 600 calculated on a reinvested dividends basis, plunged by 32.7% between 1 January and 18 March before picking up thanks to stimulus plans and central banks action, ending the first semester down by 12.12%. The crisis accentuated the sharp divide in the market, with two upward sectors (Technology and Healthcare) and six sectors losing more than 20% (Travel & Leisure, Banks, Oil & Gas, Autos, Insurance and Media). We continue to focus our investments on steeply undervalued stocks but also took advantage of market volatility to invest in some quality stocks at prices we deemed attractive.

DNCA INVEST - VALUE EUROPE turned in the following performances in the first half:

- I Shares (EUR): -22.74%
- A Shares (EUR): -23.13%
- B Shares (EUR): -23.28%
- AD Shares (EUR): -23.13%
- ID Shares (EUR): -23.19%
- H-I Shares (USD): units fully redeemed on 27 February 2020
- H-A Shares (USD): -22.39%
- IG Shares (EUR): -22.92%
- N Shares (EUR): -22.84%

#### **DNCA INVEST - VALUE EUROPE (continued)**

- ND Shares (EUR): units fully redeemed on 5 May 2020
- Q Shares (EUR): -22.45%

Against -12.12% for its benchmark, the STOXX Europe 600 calculated on a reinvested dividends basis.

#### Past performances are not a reliable indicator of future performances.

The sub-fund's top three performers in the first semester with dividends reinvested, were Fresnillo, Lanxess and Enel. The three worst were TUI Group, Cineworld Group and Babcock International Group.

Among the main changes, the sub-fund added ASR Nederland, Fresenius Kabi, Credit Agricole and Danone, while selling off TUI Group, Aggreko, Société Générale and AIB Group.

As of 30 June 2020, the portfolio's cash holdings (including funds assimilated to money-market funds) stood at +7.72%, and its net asset value at 574 million euros.

#### Second-half outlook

Despite the rapid recovery in economies late in 2020's first quarter, it is still extremely hard to say when things will return to normal. The pandemic's medium-term repercussions are indeed hard to nail down, and it is impossible to rule out the risk of a second wave. That being said, exceptional fiscal and monetary measures by governments and central banks are providing powerful support to the economy and the markets. In light of this uncertain environment and market valuations, we are taking on the second half of 2020 on a somewhat cautious footing and therefore continue to focus on company valuations.

#### **DNCA INVEST - BEYOND INFRASTRUCTURE & TRANSITION\***

#### First-half 2020 recap

Equity markets were highly volatile in the first semester. After starting off the year on the rise, market indices fell sharply in mid-February, as the global spread of Covid-19 and the resulting lockdowns triggered an unprecedented bear market combining a public health crisis, a financial crisis and an oil shock. Since April, the trend has moved back up, driven by aggressive government and central banks responses through unprecedented fiscal and monetary measures, by the gradual recovery in economies, but also by hopes for a vaccine following some conclusive clinical trials. All this naturally kept interest rates low and even negative in some cases. Meanwhile, investors have moved to a slightly more risk-on stance, despite downgraded earnings and yield forecasts. As of the end of June, the Stoxx Europe 600 calculated on a reinvested dividends basis was down by 13.4%, including a 32.7% plunge between 1 January and the 18 March bottom.

DNCA INVEST - BEYOND INFRASTRUCTURE & TRANSITION\* turned in the following performances in the first half:

- A Shares (EUR): -14.20%
- B Shares (EUR): -14.40%
- I Shares (EUR): -13.79%
- N Shares (EUR): -13.95%

Against -6.64% for its benchmark, the MSCI Europe Infrastructure calculated on a reinvested dividends basis.

#### Past performances are not a reliable indicator of future performances.

The first semester's top contributors to performance were Albioma, Cellnex Telecom, Deutsche Telekom, Enel and Voltalia. Conversely, the sub-fund took a hit from its exposure to transport infrastructures (FirstGroup, Port of Hamburg, Fraport, and Groupe ADP), as well as from Telecom Italia, Bilfinger, Telefonica and Eutelsat.

In general, we decided to hold onto our airports exposure, despite the great uncertainty on the pace of recovery in air traffic, based on quality assets and the postcrisis regulatory framework that will be favourable to this type of concessions. Meanwhile, we sold off our entire holdings of UK urban and interurban transport stocks (FirstGroup and Go Ahead Group), which are cyclical, low-margin and heavily leveraged.

The cash that we built up early in the crisis allowed us to expand the portfolio's exposure to promising new infrastructure 2.0 themes, including building renovation, digitalisation of infrastructures, logistics and e-commerce infrastructures, and sustainable mobility, including hydrogen. We have thus acquired new stocks which include Sika, Saint-Gobain, Schneider Electric, Alstom, DSV and E.ON. We also brought in Iberdrola, Energias de Portugal (EDP), Veolia and Deutsche Telekom.

Meanwhile, we sold off Telefonica, FirstGroup, Go Ahead Group, Renewi, Compagnie des Alpes, and McPhy Energy, as well as our entire international exposure for the purposes of liquidity, risk management (reduced exposure to heavily leveraged companies) and geographical rebalancing of the portfolio.

As of 30 June 2020, the portfolio's cash holdings (including funds assimilated to money-market funds) stood at +6.15%, and its net asset value at 84.7 million euros.

<sup>\*</sup>For further information regarding the investment process and the Socially Responsible Investment approach applicable to this sub-fund please refer to section "Our responsible investor philosophy and SRI management" on page 148.

#### DNCA INVEST - BEYOND INFRASTRUCTURE & TRANSITION\* (continued)

#### Second-half outlook

We are on a relatively cautious footing regarding the global macroeconomic context, and that's why the portfolio's investment ratio is about 93.8%. There are still many uncertainties on the pace at which economies will reopen, on the impacts of this sudden shock to employment, on corporate debt, on inflation, and, more broadly, on future trends in modes of production and consumption (including relocation of production chains and the acceleration in digital transitions), as well as on risks of a second wave of infections (in the absence of a vaccine or treatment). Other sources of volatility could come as a result of the upcoming US elections and renewed Sino-US tensions that would revive the threat of trade sanctions. Current market valuations do not seem to price in these risks, and there is a wide gap between the financial markets and the real economy. The only positive points in this uncertain environment are Germany's break with its traditional fiscal orthodoxy and the success of fiscal negotiations by the European Union, providing for a mutualisation of debt under a historic 750 billion euro recovery plan. This context could end up more favourable to European equity indices in the coming months.

Against this backdrop, we are confident in the sub-fund's ability to perform well. The monetary environment remains just as buoyant, and the maintaining of low real rates should continue to benefit some long-duration utilities, such as Enel, Iberdrola, Energias De Portugal, E.ON, Snam Rete Gas. A more vigorous return of inflation in the medium term would be another factor in support of these stocks, as well as circular economy players like Veolia and Suez. Renewable energy companies, such as Orsted, Voltalia, Albioma, Solarpack, and Grenergy Renovables, should continue to drive performances in the medium term and are among the main beneficiaries of green recovery plans in Europe and elsewhere in the world. The same goes for building renovation and infrastructure digitalisation companies, such as Sika, Saint-Gobain, and Schneider Electric. Transmission towers are also likely to drive performance, thanks to their visible and defensive growth features, and to their acquisition potential, which remains strong. Meanwhile, the Covid crisis should accelerate some trends, including digital transitions and, to a certain extent, support the telecom sector (Deutsche Telekom and Orange), for which network quality is key. Lastly, although there is still little visibility on an end to the crisis and on the trajectory of a resumption in traffic, the sub-fund's exposure to transport infrastructures (autoroutes and airports), which hit its performance hard in the first half (Fraport, Groupe ADP, Flughafen Zurich, Vinci, Eiffage, and Ferrovial), offers significant rebound potential in a normalised Covid-19 environment. Sustainable mobility players like Getlink or Alstom in particular should fare well.

#### **DNCA INVEST - BEYOND GLOBAL LEADERS\***

#### First-half 2020 recap

The first half of 2020 was - if nothing else - one of the most volatile and tumultuous six months the financial markets have ever experienced. And this volatility? Because of a virus that is 1000 times smaller than a human hair. From political leaders and the media, in the western hemisphere ignoring it, to making it the worst disaster the world had ever faced. It's difficult to estimate the long term economic and healthcare effects that will be linked to the disastrous acts - or non-actions - of the governments. But they will be enormous. The decisions by the central banks to print money might have been the short-term solution, but long term, the existing problems of widening economic disparity, climate change, and political strife haven't gone away. We are walking gingerly into the unknown, and even though we are seemingly muddling through this crisis, the key issues remain.

DNCA INVEST - BEYOND GLOBAL LEADERS\* turned in the following performances in the first half:

- A Shares (EUR): +8.31%
- B Shares (EUR): +8.17%
- I Shares (EUR): +8.80%
- Q Shares (EUR): +9,82%
- N Shares (EUR): +8.64%

Against -6.31% for its benchmark, the MSCI All Countries World Index Net Return, calculated on reinvested dividends basis.

#### Past performances are not a reliable indicator of future performances.

Growth investors continued to do well. Technology - and everything linked to working from home (WFH) - performed spectacularly along with healthcare, and biotechnology. On the flip side, hotels, airlines, anything cyclical...suffered. The sub-fund was slightly prescient in seeing the lack of action as having a significant impact on the equity markets. The consumer holdings we sold down to the bare minimum, and the technology and healthcare positions were kept. As a result, the outperformance of the sub-fund versus its benchmark index was as high as it has ever been.

The semester's best performance was Bioxcel Therapeutics - a small biotechnology company that announced remarkably solid trial results in a very short period of time. We remain positive on this company and it is the sub-fund's largest holding. On the flip side, the weakest performance was Bandhan Bank - an Indian holding that suffered from a combination of the lock down in India and its focus on micro-loans - a truly vicious circle!

As of 30 June 2020, the sub-fund was invested in 38 companies, even though cash holdings amounted to +9.76% of the portfolio (including money-market and money-market-like funds), and its net asset value amounted to 317.7 million euros.

As of 30 June 2020, the portfolio's cash holdings (including money-market funds) stood at +21.15%, and its net asset value at 386.6 million euros.

#### Second-half outlook

It's difficult to imagine a time where a true economic turnaround will come, so the sub-fund will remain a little on the sideline. That being said, technology and healthcare will continue to be the mainstays of the sub-fund, so we will continue to increase our weightings in our holdings on any real weakness.

#### **DNCA INVEST - CONVERTIBLES**

#### First-half 2020 recap

The main equity indices continued the rebound, while being torn between the risk of a resurgence in the pandemic and the release of reassuring economic statistics, particularly in Europe. Indeed, Europe is gaining credibility among investors on the back of its persuasive crisis management and suitable monetary and fiscal responses. Credit markets continue to hold up well, driven directly by various central banks announcements. Even so, caution is in order in this asset class, as the increase in average debt levels is masking the real problems that some borrowers are facing and that will inevitably hinder future growth potential. The release of quarterly figures will be an opportunity to see how much damage the pandemic has done, but even more importantly, to evaluate the nature of the rebound in various sectors. Against this backdrop, the primary market in convertible bonds maintains its positive dynamic with six deals totalling 3 billion euros.

DNCA INVEST - CONVERTIBLES turned in the following performances on the first half:

- I units (EUR): -6.21%
- A units (EUR): -6.55%
- B units (EUR): -6.64%
- N units (EUR): -6.28%
- B units (CHF): -6.64%
- SI units (EUR): -6.12%
- H-A units (CHF): -4.93%

Against -1.27% for its benchmark, the Exane ECI Euro calculated on a reinvested coupons basis.

#### Past performances are not a reliable indicator of future performances.

The portfolio's best performances in the first semester were by Cellnex 2028, STM 2024, Delivery Hero 2027, Worldline 2026 and Safran 2027. The sub-fund, meanwhile, took a hit from its exposures to IAG 2022, Genfit 2022, Air France 2026, Renault Perp and MTU 2027.

The portfolio's five largest holdings in the first half were: IAG 2022, Worldline 2026, Fresenius 2024, Cellnex 2028 and Carrefour 2023. Otherwise, we sold off 13 bond holdings, while adding 15 new ones.

As of 30 June 2020, the portfolio's cash holdings stood at +0.70% and its net asset value at 598.7 million euros.

#### Second-half outlook

Convertible bonds are holding up well and are likely to continue doing so in the coming months, as they are still attractively priced on a technical level. The sub-fund suffered from its bond mix positioning, despite a non-defaulting security selection. But it still offers a substantial upside potential, which began to show up in June. The sub-fund's barbell-like profile gives it exposure to both the credit driver, which should continue to return to normal, backed by various support measures, and the equity driver, which should be able to capture even a partial economic recovery. Historically, there is a close correlation between these two main markets during economic recoveries. The European pool is currently heavily weighted in "deadweight" convertibles, which should hold up well but offer little upside potential. Close attention should be paid to the deflating of the credit bubble, as it is likely to come with an increase in default rates. The pandemic has laid bare certain companies' excesses and weaknesses. The sub-fund will therefore continue to adhere to a strict methodology in its selection criteria on both the primary and secondary markets, avoiding any excessive risk-taking whenever credit ratios are tangential or business activity and/or capital structure is opaque (Argentum/Wirecard). The portfolio is on a cautious footing, with an actuarial yield of 0.68% and a delta of 34.7% vs. -1.4% and 33% for its benchmark.

#### **DNCA INVEST - MIURI**

#### First-half 2020 recap

The equity markets finished the first half of 2020 in negative territory, amidst a spike in volatility. We had started the year somewhat optimistically, but soon had to revise our global economic growth forecasts and the earnings trajectories of portfolio companies. The public health crisis that began in China spread quickly to Europe and America. Some sectors collapsed, particularly those related to tourism, including hotels, airlines, and aerospace. Other sectors held up better, including healthcare, food retailing, and telecoms. The highlight of the crisis was no doubt the prompt and massive action by governments and central banks to manage the inevitable contraction in economic activity as best as they could.

DNCA INVEST - MIURI ended the first semester in positive territory, driven by active management of its net exposure and the solid performances of some telecom operator, healthcare, and IT service securities.

DNCA INVEST - MIURI turned in the following performances during the first half:

- I Shares (EUR): +0.92%
- A Shares (EUR): +0.60%
- B Shares (EUR): +0.52%
- Q Shares (EUR): +1.58%
- AD Shares (EUR): +0.60%
- N Shares (EUR): +0.87%
- H-I Shares (USD): +1.55%
- H-A Shares (USD): +1.16%
- BG Shares (EUR): +0.48%

#### DNCA INVEST - MIURI (continued)

Against -0.23% for EONIA, the sub-fund's benchmark.

#### Past performances are not a reliable indicator of future performances.

The sub-fund's 12-month volatility is 7.9%, against a target of no more than 5.0%. The increase in volatility during the first half was due mainly to the steep rise in market volatility. It nonetheless remained contained at 5.8% over a three-year period.

Over the first semester of the year, DNCA Invest – Miuri's performance was driven by its holdings in Iliad, STMicroelectronics, Schneider-Electric and Atos. As of 30 June 2020, the sub-fund held 50 stocks and market exposure via EuroStoxx 50, DAX and CAC 40 index futures, as well as sector indices. Saint-Gobain, LafargeHolcim, Peugeot, Schneider-Electric and Atos are the portfolio's main long convictions.

Gross exposure (i.e., long positions + short positions compared to its net asset value) amounted to 160% and its net exposure (shares + long CFDs – short CFDs – futures compared to its net asset value) stood at 9.4%.

As of 30 June 2020 the portfolio's cash holdings stood at +12.64% (including funds assimilated to money market funds) at the end of the first half, and its net asset value at 310 million euros.

#### Second-half outlook

The economic scenario of the second half of the year is still hard to read and at this stage we cannot rule out the risk of a relapse in economies. Scientific advances in Covid-19 appear as the 12 months out decisive factor, but the long-term repercussions of the crisis must not be overlooked, including increased debt, logistical disruption, and higher operating costs. Against this backdrop, we are carefully overweighting sectors that seem to be emerging from the crisis most rapidly, including construction and technology, or those with a defensive profile, such as telecom operators and healthcare. The rest of the year will also be driven by the US elections. A victory by Joe Biden would certainly be negative in the short terms for corporate earnings (due to higher taxes) but could have a positive impact on business confidence.

#### **DNCA INVEST - EUROPE GROWTH**

#### First-half 2020 recap

The year 2020 has been shaken to its core by the spread of Covid-19, first within China and then in the rest of the world. This sad, unprecedented event will probably trigger disruptions in the behaviour of households, governments and companies. Fortunately, and unlike in 2008, central banks and governments have been credible and quick to respond in word and in deed in supporting economies that have been in dire need of such support. In Europe, the Franco-German initiative of a European recovery plan, mainly for the southern part of the continent, has paid off. On the other hand, there has been a clear resurgence in tensions between the US and China.

DNCA INVEST - EUROPE GROWTH turned in the following performances in the first half:

- A Shares (EUR): 0.00%
- B Shares (EUR): 0.00%
- I Shares (EUR): 0.00%
- ID Shares (EUR): -0.46%
- F Shares (EUR): 0.00%
- H-A Shares (USD): +0.50%
- H-I Shares (CHF): +1.93%
- H-I Shares (USD): +1.93%
- N Shares (EUR): 0.00%
- IG Shares (EUR): 0.00%
- Q Shares (EUR): +2.05%
- AD Shares (EUR): -0.98%

Against -12.12% for its benchmark, the Stoxx Europe 600 NR calculated on a reinvested dividends basis.

#### Past performances are not a reliable indicator of future performances.

Our main convictions were once again the main contributors to the sub-fund's performance in the first semester. These included BioMérieux, Sartorius Stedim and Lonza. The sub-fund's heavy exposure to Healthcare (about 40%) has kept it resilient on a turbulent market. We might also mention Solutions 30 and Flutter Entertainment, which are likely to benefit from the Covid-19 crisis.

Disappointments included the most cyclical segments, particularly in air transport, with Dassault Aviation, Amadeus IT and Thales. Fortunately, we had underweighted these companies.

In reaction to this crisis environment, we had to revise some of our holdings, which will take big hits to their EPS (earnings per share). That's why we sold off our residual positions in Dassault Aviation, Amadeus IT and Soitec. We also reduced our exposure to LVMH, Sika and IMCD (chemicals sector), Alten (heavily exposed to auto and aerospace clients), and Teleperformance (whose business is being disrupted by lockdowns in emerging economies, with its subsidiary TLS Contact hit especially hard). In contrast, we have raised our exposure to companies enjoying strong visibility, most of them in healthcare, including Orpea, BioMérieux, Lonza, Galenica and Safestore Holdings.

## **Directors' Report (continued)**

#### **DNCA INVEST - EUROPE GROWTH (continued)**

We also initiated an investment in the UK company Reckitt Benckiser, which is ideally positioned in segments that will benefit from the current public health crisis, including Hygiene, Home Maintenance, OTC Drugs and Infant Nutrition. Reckitt Benckiser has also been in the midst of a turnaround since autumn 2019, with a complete shift of its management team. It is one of the few companies that could deliver positive surprises in its 2020 results.

As of 30 June 2020, the portfolio's cash holdings stood at to +2.50%, and its net asset value at 1 447 million euros.

#### Second-half outlook

Our main convictions for 2020 are once again in Healthcare (Pharmaceuticals, Retirement Homes and MedTech), Speciality Chemicals, Technology and Business Services. We are currently completely absent from the hardest-hit sectors (Automotive, Leisure, Financials and Aerospace), visibility in which will remain quite limited until a Covid-19 vaccine or remedy has been found.

Lastly, we feel it is important to stress the sub-fund's very small carbon footprint, which is estimated at just 21 tonnes of CO2 per million euros invested, or seven times less than its benchmark index! This makes sense, as the sub-fund is structurally underweighted in highly polluting sectors, such as oil & gas, commodities and utilities. Clearly, socially responsible investment (SRI) is a long-term trend that we will have to accompany.

#### **DNCA INVEST - ARCHER MID-CAP EUROPE**

#### First-half 2020 recap

The year 2020 has been shaken to its core by the spread of Covid-19, first within China and then the rest of the world. This sad, unprecedented event will probably trigger disruptions in the behaviour of households, governments and companies. Fortunately, and unlike in 2008, central banks and governments have been especially credible and quick to respond in word and in deed in supporting economies that have been in dire need of such support. The Franco-German initiative of a European recovery plan, mainly for the southern part of the continent, has paid off. On the other hand, there has been a clear resurgence in tensions between the US and China.

DNCA INVEST - ARCHER MID-CAP EUROPE turned in the following performances in the first half:

- I Shares (EUR): 0.00%
- A Shares (EUR): -0.16%
- B Shares (EUR): -0.37%
- N Shares (EUR): -0.02%
- Q Shares (EUR): +0.54%

Against -12.49% for its benchmark, the MSCI EUROPE MID CAP NR with calculated on a reinvested dividends basis.

#### Past performances are not a reliable indicator of future performances.

The sub-fund invests in the attractive segment of European midcaps. We take the following approach: holding quality companies with excellent performances and bright prospects, while remaining painstaking in terms of valuation.

The sub-fund's performance played out against the backdrop of a highly eventful first half. The sub-fund outperformed European equity markets considerably, driven not by an especially defensive positioning but, rather, by favourable stock-picking. We were fully invested throughout the first half and were happy to take advantage of the volatility that emerged in March to adjust the portfolio to the changing environment.

The sub-fund's biggest contributors to performance in the first half included the meal kit maker HelloFresh, the video game publisher Stillfront and the IT distributor Also Holding. We have held these companies for some time now, due to excellent execution by their respective management teams and certain "tailwinds" that are now more apparent to the average investor.

Underperformers include companies that have been hit by short-term disruptions, such as the cider maker and spirits distributor C & C, Wizz Air, Dalata hotels, and financial establishments, such as the Norwegian online bank Sbanken and the leasing company ALD.

As of 30 June 2020, the portfolio's cash holdings stood at +1.10%, and its net asset value at 159.8 million euros.

#### Second-half outlook

We are seeking to maintain the right balance between companies able to perform well in the current unusual economic environment. Meanwhile, we invest selectively in companies facing short-term "headwinds" as long as they possess solid balance sheets, and proactive management teams able to weather these tough times in better financial health than their competitors. These are probably the portfolio companies that offer the greatest medium-term potential.

#### **DNCA INVEST - NORDEN EUROPE**

#### First-half 2020 recap

The year 2020 has been shaken to its core by the spread of Covid-19, first within China and then the rest of the world. This sad, unprecedented event will probably trigger disruptions in the behaviour of households, governments and companies.

#### DNCA INVEST - NORDEN EUROPE (continued)

Fortunately, and unlike in 2008, central banks and governments have been credible and quick to respond in word and in deed in supporting economies that have been in dire need of such support. In Europe the Franco-German initiative of a European recovery plan, mainly for the southern part of the continent, has paid off. On the other hand, there has been a clear resurgence in tensions between the US and China.

DNCA INVEST - NORDEN EUROPE turned in the following performances in the first half:

- I Shares (EUR): +7.34%
- A Shares (EUR): +6.62%
- B Shares (EUR): +6.27%
- Q Shares (EUR): +10.20%

Against -5.69% for its composite index consisting of 40% MSCI Nordic, 35% DAX, 15% SMI, and 10% MSCI UK TR UK Net Local Currency, calculated on a reinvested dividends basis.

#### Past performances are not a reliable indicator of future performances.

Our main convictions were once again the main contributors to the sub-fund performance in the first semester. Healthcare stocks such as Bachem, Sartorius Stedim Biotech, Lonza, and Galenica have been strong outperformers during this major public health crisis. We would also point out our exposure to the online game sector, with Net Entertainment, Stillfront Group, and, more recently, Evolution Gaming, all of which received a big boost during the lockdowns. Net Entertainment came under a friendly takeover bid from its Swedish peer Evolution Gaming, with a premium of about 40%. The new additions (Musti Group, TeamViewer, Pexip, Roche) performed very well on the whole.

Disappointments included Bravida and Dalata Hotels, which were sold off, as their top-line and earnings per share (EPS) prospects appear to have taken a sustained hit from the current environment.

In contrast, we added to our exposure to companies enjoying high visibility, most often in healthcare, including Lonza, Galenica, Roche and Safestore Holdings. We also added to our weighting of Stillfront Group, a leader in online games. We also initiated an investment in the UK company Reckitt Benckiser, which is ideally positioned in segments that will benefit from the current public health crisis, including Hygiene, Home Maintenance, OTC Drugs and Infant Nutrition. Reckitt is also in the midst of a turnaround since autumn 2019, with a full reworking of its management team. It is one of the few companies that could deliver positive surprises in its 2020 results.

As of 30 June 2020, the portfolio's cash holdings stood at -0.28%, and its net asset value at 211.3 million euros.

#### Second-half outlook

Our main convictions for 2020 are in Healthcare (pharmaceuticals and medtech), Scandinavian Property & Casualty Insurance, Speciality Chemicals, Technology and Business Services. We are currently completely absent from the hardest-hit sectors (Automotive, Leisure, Financials and Aerospace), visibility in which will remain quite limited until a Covid-19 vaccine or remedy has been found.

Lastly, we feel it is important to stress the sub-fund's very small carbon footprint, which is estimated at just 29.5 tonnes of CO2 per million euros invested, or six times less than its benchmark index! This makes sense, as the sub-fund is structurally underweighted in highly polluting sectors, such as oil & gas, commodities and utilities. Clearly, socially responsible investment (SRI) is a long-term trend that we must accompany.

#### **DNCA INVEST - SERENITE PLUS**

#### First-half 2020 recap

Financial markets rebounded for the third consecutive month after plunging in March. The various post-lockdown situations seem to indicate that a return to normal is indeed possible. Above all, the markets now appear to have stated that the "low point" is definitively behind. Even so, the number of new infections continues to rise worldwide. In the euro zone, various governments continue to boost their financial assistance, and central banks confirm that there should be no problem in funding these additional fiscal deficits. On this path to normalisation, euro zone sovereign rates were stable on the whole, with the Bund ending the half at -0.45% and the FTSE MTS 1-3Y calculated on a reinvested coupons basis up by 0.34%. Credit market's Investment grade and high yield also gained ground.

On the first half of the year, DNCA INVEST - SERENITE PLUS turned in the following performances:

- I Shares (EUR): -1.34%
- A Shares (EUR): -1.52%
- B Shares (EUR): -1.61%
- AD Shares (EUR): -1.74%
- ID Shares (EUR): shares redeemed in full in March 2020

Against -0.22% for its benchmark, the FTSE MTS Index 1-3 years calculated on a reinvested coupons basis .

#### Past performances are not a reliable indicator of future performances.

Among the top performance contributors of the sub-fund during the first semester of the year we find the Orange perpetual call 2021, Arcelor Mittal 2023 and AMS 2024 bonds, while Italy Inflation 2024, Corestate 2022 and Air France 2025 fared less well.

#### DNCA INVEST - SERENITE PLUS (continued)

The main changes during the first half included investments in Accor February 2021, Leonardo January 2021 and FCA July 2022. On the other hand, the America Movil CV, Deutsche Bank Sub 24/06/20 and the Haniel/Metro exchangeable were redeemed.

As of 30 June 2020, the portfolio's cash holdings (including money-market funds) stood at +6.07%, and its net asset value at 256 million euros.

#### Second-half outlook

No changes are planned to the investment strategy against this backdrop of a very gradual return to normal, punctuated by fears of new waves of infections and the hope for a treatment and/or a vaccine. Companies will be putting out their second-quarter numbers, which, barring surprises, will be the worst in recent peacetime history. But companies, especially those in the portfolio, have done so much to get to the other side – helped along by governments and central banks – that we can start to consider what the post-crisis environment will look like. Amidst this backdrop, it is worth continuing to overweight credit assets : DNCA Invest – Sérénité Plus has raised its corporate debt exposure from 60% at the start of the year to almost 80% currently.

#### **DNCA INVEST - VENASQUO**

#### First-half 2020 recap

The equity markets fell during the first half 2020, amidst a spike in volatility. We had started the year somewhat optimistically but soon had to revise our global economic growth forecasts and the earnings trajectories of portfolio companies. The public health crisis that began in China spread quickly to Europe and America. Some sectors collapsed, particularly those related to tourism, including hotels, airlines, and aerospace. Other sectors held up better, including healthcare, food retailing, and telecoms. The highlight of the crisis was no doubt the prompt and massive action by governments and central banks to manage the inevitable contraction in economic activity as best as they could.

The sub-fund's performance was hit in the first half by falling equity markets. Stock-picking and active management of its net exposure allowed the sub-fund to outperform its benchmark index.

On the first half of the year, DNCA INVEST - VENASQUO turned in the following performances

- I Shares (EUR): -3.83%
- A Shares (EUR): -4.14%
- B Shares (EUR): -4.32%
- Q Shares (EUR): -3.47%
- N Shares (EUR): -3.90%

Against -5.51% by its composite benchmark index consisting in 50% EONIA + 50% EuroStoxx 50 calculated on a reinvest coupons and dividends basis.

#### Past performances are not a reliable indicator of future performances.

As of the end of June, the sub-fund's 12-month volatility was 19.1%, but its three-year figure was just 13%. We will continue to take measures to reduce volatility, as market volatility rose sharply during the first half.

In the first half of the year, DNCA Invest – Venasquo got a boost mainly from its long positions in Iliad, STMicroelectronics, Schneider-Electric and Atos. As of 30 June 2020, the sub-fund was invested in 45 stocks and exposed to the market via EuroStoxx 50, DAX and CAC 40 futures, as well as sector indices. Saint-Gobain, Cap Gemini, LafargeHolcim, Atos and Peugeot are the portfolio's main long convictions.

As of 30 June 2020, the portfolio's cash holdings stood at +9.43%, and its net asset value at 130.2 million euros.

Gross exposure (i.e., long positions + short positions compared to its net asset value) amounted to 148% and net exposure (shares + long CFDs - short CFDs - futures compared to its net asset value) stood at 59.0%.

#### Second-half outlook

We are beginning the second half of the year with net exposure slightly above our benchmark (59% vs. 50%) but while continuing to focus on stock-picking rather than market direction. We gave strengthen the "value" portion of the DNCA Invest – Venasquo portfolio, which now accounts for almost 75% of the long portfolio. It consists of low-priced companies (with P/Es of about 10x and FCF yield of 10%), with solid balance sheets and whose activity is expected to continue to grow in the coming years. The rest of the portfolio consists of companies whose growth potential looks underestimated by the market. These investments are focused on companies that are tapping into the digital manufacturing revolution, the expansion of major urban centres and the growth in international tourism.

#### **DNCA INVEST - GLOBAL CONVERTIBLES**

#### First-half 2020 recap

The main equity indices continued to rebound, while being torn between the risk of a resurgence in the pandemic and the release of reassuring economic statistics, particularly in Europe. Indeed, Europe is gaining credibility among investors on the back of its persuasive crisis management and suitable monetary and fiscal responses. Credit markets continue to hold up well, driven directly by various central bank announcements. Even so, caution is in order in this asset class, as the increase in average debt levels is masking the real problems that some borrowers are facing and that will inevitably hinder future growth potential. The release of quarterly figures will be an opportunity to see how much damage the pandemic has done, but even more importantly, to evaluate the nature of the rebound in various sectors.

## **Directors' Report (continued)**

#### **DNCA INVEST - GLOBAL CONVERTIBLES (continued)**

Against this backdrop, the primary market in international convertible bonds continues it positive dynamic with 150 deals for a total of 76 billion euros.

On the first half of the year, DNCA INVEST - GLOBAL CONVERTIBLES turned in the following performances in the first half:

- I Shares (EUR): -0.12%
- A Shares (EUR): -0.48%
- B Shares (EUR): -0.58%
- Q Shares (EUR): +0.19%
- N Shares (EUR): -0.16%

Against +4.42% for its benchmark, the UBS Thomson Reuters Global Focus CB, calculated on a reinvested coupons basis.

#### Past performances are not a reliable indicator of future performances.

The portfolio's best performances in the first half were by Sea Ltd 2024, Docusign 2023, Etsy 2026, Everbridge 2024 and Chegg 2025. Conversely, the Air France 2026, GOL 2024, IAG 2022, Akka Perp and Genfit 2022 holdings fared less well.

The portfolio's five largest positions during the first half were IAG 2022, Veolia 2025, Air France 2026, Ubisoft 2024 and Soitec 2023.

As of 30 June 2020, the portfolio's cash holdings stood at +2.03% and its net asset value at 81 million euros.

#### Second-half outlook

Convertible bonds are holding up well and are likely to continue doing so in the coming months, as they are still attractively priced on a technical level. The sub-fund suffered from its positioning on bond mix, despite a non-defaulting security selection. But it still offers a substantial upside potential, which began to show up in June. The sub-fund's barbell-like profile gives it exposure to both the credit driver, which should continue to return to normal, backed by various support measures, and the equity driver, which should be able to capture even a partial economic recovery. Historically, there is a close correlation between these two main markets during economic recoveries. The European pool is currently heavily weighted in "deadweights", which are likely to hold up well, but which also offer little upside potential. Close attention should be paid to the deflating of the credit bubble, as it is likely to come with an increase in default rates. The pandemic has laid bare certain companies' excesses and weaknesses. The sub-fund will therefore continue to adhere to a strict methodology in its selection criteria on both the primary and secondary markets, avoiding any excessive risk-taking whenever credit ratios are tangential, or business activity and/or capital structure is opaque (Argentum/Wirecard). The portfolio is on a cautious footing, with an actuarial yield of 0.33% and a delta of 46.39% vs. -3.4% and 44.3% for its benchmark.

#### **DNCA INVEST - ALPHA BONDS**

#### First-half 2020 recap

The positive momentum in economic growth seen in late 2019 was brought to a sudden halt by the global spread of Covid-19. Social distancing measures triggered a very steep drop in economic activity and an almost total halt to sectors such as tourism and recreation, and severely disrupted global trade. Against this backdrop, global GDP could contract on a full-year basis for the first time since 2009. Central banks reacted quickly and aggressively to this downgraded environment by slashing their key rates, pumping liquidity into the financial markets and expanding their quantitative easing programmes. Governments joined them, bringing vast resources to bear to mitigate the decline in consumers' revenues and assisting distressed companies, with the goal of restarting economic activity in the future. As of the end of the first half, the economic slowdown appeared to have bottomed out, but the recovery is likely to be tentative, as the ongoing spread of Covid-19 in many countries is throwing up a powerful hurdle to an across-the-board recovery.

Against this backdrop, the financial markets have strongly recovered after taking a big initial hit, particularly the equity markets, which were driven by skyrocketing "tech" stocks, which were hit less hard than traditional stocks and driven by abundant, low-cost liquidity.

On the first half of the year, DNCA INVEST - ALPHA BONDS turned in the following performances in the first half:

- I Shares (EUR): -4.67%
- A Shares (EUR): -4.96%
- B Shares (EUR): -5.06%
- N Shares (EUR): -4.78%
- Q Shares (EUR): -4.50%
- ND Shares (EUR): -4.78%
- SI Shares (EUR): -4.62%
- H-I Shares (CHF): -2.99%
- H-I Shares (USD): -3.86%
- F Shares (EUR): -4.57%
- ID Shares (EUR): -4.74%
- H-A Shares (CHF): -3.29%
- H-A Shares (USD): -4.20%
- AD Shares (EUR): -4.96%

Against +1.04% for its benchmark EONIA +2.5%.

#### DNCA INVEST - ALPHA BONDS (continued)

#### Past performances are not a reliable indicator of future performances.

The sudden drop in economic activity undermined the performance of the sub-fund, which was positioned mainly towards higher yields and inflation, in accordance with expectations of robust growth and low unemployment. After repositioning ourselves towards a new, less buoyant economic scenario and factoring in monetary and fiscal measures, we were able to improve returns early in the second quarter, but without returning to the levels of the start of the year. At the end of the first semester, we still had significant exposure to higher inflation, due to the excessive compression of inflation break-even points, but this is now offset by a generally positive exposure to duration on fixed-rate bonds. The portfolio's composition thus looks more able to cope with an economic environment that remains highly uncertain. Meanwhile, our combination of positions allows us to reduce portfolio volatility, which had reached excessive levels in late March.

As of 30 June 2020, the portfolio's cash holdings stood at +12.78%, and its net asset value at 2,776 million euros.

#### Second-half outlook

On the macroeconomic front, we remain very cautious on prospects for a robust recovery in the second half of the year and thereafter, as several drivers of growth don't appear to be working. For example, household consumption is likely to be hindered by rising unemployment rates; business investment remains weak amidst the prevailing uncertainty; and foreign trade continues to be dragged down by social distancing measures in many countries not to mention the Sino-US trade war.

As for our strategy, despite this unfavourable economic environment, and given valuations on the bond markets, the portfolio's exposure is likely to remain in positive territory but to a limited extent. Lastly, we continue to overweight inflation-linked bonds, which offer a risk/reward profile that is more suited to the current market environment.

#### **DNCA INVEST - FLEX INFLATION**

#### First-half 2020 recap

The positive momentum in economic growth seen in late 2019 was brought to a sudden halt by the global spread of Covid-19. Social distancing measures triggered a very steep drop in economic activity and an almost total halt to sectors such as tourism and recreation, and severely disrupted global trade. Against this backdrop, global GDP could contract on a full-year basis for the first time since 2009. Central banks reacted quickly and aggressively to this downgraded environment by slashing their key rates, pumping liquidity into the financial markets and expanding their quantitative easing programmes. Governments joined them, bringing vast resources to bear to mitigate the decline in consumers' revenues and assisting distressed companies, with the goal of restarting economic activity in the future. As of the end of the first half, the economic slowdown appeared to have bottomed out, but the recovery is likely to be tentative, as the ongoing spread of Covid-19 in many countries is throwing up a powerful hurdle to an across-the-board recovery.

Against this backdrop, the financial markets have strongly recovered after taking a big initial hit, particularly the equity markets, which were driven by skyrocketing "tech stocks", which were hit less hard than traditional stocks and driven by abundant, low-cost liquidity.

On the first half of the year, DNCA INVEST - FLEX INFLATION turned in the following performances in the first half:

- I Shares (EUR): -2.77%
- A Shares (EUR): -3.08%
- B Shares (EUR): -3.18%
- N Shares (EUR): -2.88%
- Q Shares (EUR): -2.60%
- SI Shares (EUR): -2.72%

Against +5.69% by its benchmark calculated on a net-fee basis, the Bloomberg Barclays World Govt Inflation Linked Bonds Hedged EUR.

#### Past performances are not a reliable indicator of future performances.

The sudden drop in economic activity undermined the performance of the sub-fund, which was positioned mainly towards higher yields and inflation, in accordance with expectations of robust growth and low unemployment. After repositioning ourselves towards a new, less buoyant economic scenario and factoring in monetary and fiscal measures, we were able to improve returns early in the second quarter, but without returning to the levels of the start of the year. At the end of the first half, we still had significant exposure to higher inflation, due to the excessive compression of inflation break-even points, but we raised our bond exposure considerably by buying inflation-linked bonds from various countries.

As of 30 June 2020, the portfolio's cash holdings stood at +25.37%, and its net asset value at 204.7 million euros.

#### Second-half outlook

On the macroeconomic front, we remain very cautious on prospects for a robust recovery in the second half of the year and thereafter, as several drivers of growth don't appear to be working. For example, household consumption is likely to be hindered by rising unemployment rates; business investment remains weak amidst the prevailing uncertainty; and foreign trade continues to be dragged down by social distancing measures in many countries not to mention the Sino-US trade war.

Regarding our strategy, against this unfavourable economic backdrop and given the valuations reached on the bond markets, portfolio exposure is likely to range in positive territory from 6% to 10%. Lastly, we are keeping significant exposure to inflation break-even points in the portfolio, as they are likely to get a boost from a rebound in the coming months, given the impressive expansion in money supply to rein in the impact of the crisis.

#### DNCA INVEST - BEYOND ALTEROSA\*

#### First-half 2020 recap

Since February 2020, the macroeconomic situation has taken a sharp turn for the worse, triggering a drop on the markets, followed by an unprecedented rebound. The public health situation worsened in March, spreading to Europe and dragging down 2020 earnings forecasts. It now appears clear that the economy will remain in the doldrums for a long time to come. On top of this exogenous factor, the oil price war launched by Saudi Arabia triggered price drops of West Texas Intermediate (WTI) of 25% to USD 31.1/bbl. and of Brent of 24% to USD 34.4/bbl. after they had approached all-time lows in mid-March.

In reaction to the combination of these two phenomena, we have put the portfolio on a far more cautious footing. The markets have moved past their end-2018 levels, but with two essential differences: the very likely acceleration in default rates among companies hit directly by the drop in oil prices (led by oil & gas equipment suppliers) and the spread of the virus, which also weakened the most heavily leveraged companies during the first half. These two factors, which were originally separate, are now converging towards the same outcome – an undermined financial system and the recession that is now looming seriously over our economies.

One central bank after another has come out with announcements. The US Federal Reserve got things started with two 50 basis points (bp) rate cuts, which was unprecedented between two regularly scheduled monetary policy meetings. The Bank of England (BoE) lowered its rates by 50bp. The European Central Bank (ECB) ultimately announced no rate cuts. Even so, the markets mostly shrugged off these policy announcements, which have lost much of their credibility. Only fiscal stimuluses paired with targeted support for weak companies have managed to create a lull.

On the first half of the year, DNCA INVEST - BEYOND ALTEROSA\* turned in the following performances:

- I Shares (EUR): -4.56%
- A Shares (EUR): -4.93%
- N Shares (EUR): -4.68%
- Q Shares (EUR): -4.35%

Against -1.69% for its composite benchmark consisting of 30% EuroStoxx and 70% FTS MTS Global calculated on reinvested dividends and coupons basis.

#### Past performances are not a reliable indicator of future performances.

The top contributors to performance in the equity allocation were:

- Air Liquide (Environmental and Medical Transition): +26bp
- L'Oréal (No Transition): +25bp
- SEB (Lifestyle Transition): +15bp
- Novo Nordisk (Medical Transition): +13bp
- Dassault Systèmes (Lifestyle Transition): +8bp

The worst contributors in the equity allocation were:

- Crédit Agricole (Economic Transition): -55bp
- Korian (Medical Transition): -35bp
- Danone (Medical Transition): -32bp
- Bouygues (Environmental Transition): -25bp
- Michelin (Lifestyle Transition): -24bp

We sold off our entire position in Umicore after a new industrial accident at its Belgian facility and given its massive exposure to the auto sector.

As of the end of the first half, the sub-fund was 27.8% exposed to equities, with an estimated dividend yield of 2.7% (for dividends paid out in 2020); the bond allocation's yield came to 2.4%, with a low sensitivity of 2.1. Its average exposure during the year was 35%. Its extra-financial characteristics include a 73% exposure to the sustainable transition, based on our analysis conducted using our proprietary Above and Beyond Analysis (ABA) tool.

During the first half of the year, the high volatility in the credit market linked to the development of the virus provided an opportunity to strengthen the credit allocation, in order to take advantage of returns that had once again become attractive, while remaining selective on the overall credit risk of the portfolio. Several portfolio lines have been strengthened, and new bonds have entered the portfolio, without any specific distinction of sector and/or rating. In return, sovereign bonds, indexed to inflation, are reduced by half, to less than 5% at the end of the period. The prospect of deteriorating public finances and very uncertain inflation forecasts, coupled with low yields, encourages a trade-off in favour of corporate debts, which benefit from government aid.

The sub-fund also continued to diversify in its equity allocation, bringing in seven new positions: BUREAU VERITAS (with a sustainability score of 7.3), DASSAULT SYSTEMES (8.2), ENEL (5.8), INTESA SANPAOLO (7.2), L'ORÉAL (7.0), STMICROELECTRONICS (4.7) and VEOLIA ENVIRONMENT (6.0). The sub-fund retained a growth bias, with two thirds of its equity allocation devoted to this theme.

As of 30 June 2020, the portfolio's cash holdings (including money-market funds) stood at +15.64%, and its net asset value at 62.3 million euros.

## **Directors' Report (continued)**

#### **DNCA INVEST - BEYOND ALTEROSA\* (continued)**

#### Second-half outlook

We have been on a cautious footing since early February, in accordance with our wealth-management mandate. The exposure ratio was lowered from 38 (in early February) to 22% and has since been raised back to about 28%.

In the equity allocation, the main positions offer at least one of three conditions: liquidity, defensiveness or a solid balance sheet. They also comply with our strong convictions in terms of quality, sector leadership, and resilience during the 2008 crisis (in inventory and production management, and pricing power). Securities with market caps below 5 billion euros account for 1% of the portfolio; healthcare and agro-food account for 8.3%. the equity allocation's average debt is 1.88x net debt/EBITDA and its average beta is 0.79.

Regarding the portfolio's bond portion, we do not make any major change in strategy: interest rate and credit risks remain under control, with a low sensitivity (2.1) and a minor allocation to the high-yield segment (39%). Finally, cash flow is maintained at a high level of 14%, in order to manage volatility.

#### **DNCA INVEST - BEYOND SEMPEROSA\***

#### First-half 2020 recap

Since February 2020, the macroeconomic situation has taken a sharp turn for the worse, triggering a drop on the markets, followed by an unprecedented rebound. The public health situation worsened in March, spreading to Europe and dragging down 2020 earnings forecasts. It now appears clear that the economy will remain in the doldrums for a long time to come. On top of this exogenous factor, the oil price war launched by Saudi Arabia triggered price drops of West Texas Intermediate (WTI) of 25% to USD 31.1/bbl. and of Brent of 24% to USD 34.4/bbl. after they had approached all-time lows in mid-March.

In reaction to the combination of these two phenomena, we have put the portfolio on a far more cautious footing. The markets have moved past their end-2018 levels, but with two essential differences: the very likely acceleration in default rates among companies hit directly by the drop in oil prices (led by oil & gas equipment suppliers) and the spread of the virus, which also weakened the most heavily leveraged companies during the first half. These two factors, which were originally separate, are now converging towards the same outcome – an undermined financial system and the recession that is now looming seriously over our economies.

One central bank after another has come out with announcements. The US Federal Reserve got things started with two 50 basis points (bp) rate cuts, which was unprecedented between two regularly scheduled monetary policy meetings. The Bank of England (BoE) lowered its rates by 50bp. The European Central Bank (ECB) ultimately announced no rate cuts. Even so, the markets mostly shrugged off these policy announcements, which have lost much of their credibility. Only fiscal stimuluses paired with targeted support for weak companies have managed to create a lull.

On the first half of the year, DNCA INVEST - BEYOND SEMPEROSA\* turned in the following performances:

- I Shares (EUR): -0.91%
- A Shares (EUR): -1.67%
- N Shares (EUR): -1.34%
- Q Shares (EUR): -0.55%

Against -12.37% for its benchmark index, the EuroStoxx 50 NR calculated on a reinvested dividend basis.

#### Past performances are not a reliable indicator of future performances.

The equity allocation's top contributors to performance in the first half were:

- BioMérieux (Medical Transition): +89bp
- Albioma (Environmental Transition): + 48bp
- Mayr-Melnhof (Lifestyle Transition): +38bp
- Symrise (Medical Transition): +37bp
- Schneider Electric (Environmental Transition): +36bp

The equity allocation's worst contributors were:

- Rational (Lifestyle Transition): -94bp
- Bureau Veritas (Economic Transition): -72bp
- Saint Gobain (Environmental Transition): -66bp
- Michelin (Lifestyle Transition): -55bp
- Adidas (Medical Transition): -53bp

Broadly speaking, we decided to reduce or sell off certain cyclical and industrial stocks, leveraged companies (with net debt/EBITDA ratios higher than 2x) and lowliquidity stocks. For example, we sold off Korian completely, due to its exposure to the Covid-19 crisis, with an exacerbation in reputational risks. We also sold off Umicore after a new industrial accident at its Belgian facility and due to its massive exposure to the auto sector. With 90% exposure at the end of February, we took advantage of the slight rebound in early March to ease our holdings in stocks that had held up well and that we had deemed risky, including Novo Nordisk (with its major production facility in China and 16% of its revenues generated there) and Kingspan (operating in the sensitive sector of construction). We also opened up a position in BioMérieux following its sales warning, as it is well placed to benefit from the development of Covid-19 tests.

## **Directors' Report (continued)**

#### **DNCA INVEST - BEYOND SEMPEROSA\* (continued)**

We also sold illiquid stocks (2CRSI, Bonduelle, fully divested), highly leveraged stocks (Hera, Voltalia, Albioma) and stocks correlated to oil prices (Novozymes, fully divested). We are currently conducting 2009-based stress tests with a view to switching from positions with top-line and high-margin squeeze risks (Saint Gobain, STMicroelectronics, and ASML) to defensive sectors such as healthcare and agro-food and quality stocks (Geberit, Rational, Givaudan, Iberdrola, etc.). We did so recently, raising the portfolio's exposure to 80%.

As of 30 June 2020, the portfolio's cash holdings (including money-market funds) stood at +14.50%, and its net asset value at 143.8 million euros.

#### Second-half outlook

We are staying on a cautious footing for the second half, with exposure of about 82%. The portfolio is invested in 38 stocks, with equity exposure of 82%. In accordance with our socially responsible investment (SRI) management style, the portfolio is focused on a "top 10" accounting for about 33%, which is below our annual average, reflecting the gradual reduction in our strong convictions, which have outperformed.

The main positions of the sub-fund below offer at least one of three conditions: liquidity, defensiveness or a solid balance sheet. They also comply with our strong convictions in terms of quality, sector leadership, and resilience during the 2008 crisis (in inventory and production management, and pricing power):

- Air Liquide: 2.23%
- Iberdrola: 4.41%
- Dassault Systèmes: 3.74%
- Adidas: 2.84%
- Bureau Veritas: 3.26%

Stocks whose market caps are below 5 billion euros account for less than 15% of the portfolio (including 1% that are smaller than 1 billion euros). Healthcare and agro-food account for about 30% of the portfolio. The portfolio's average leverage is 1.9x net debt/EBITDA and its average beta is 0.73. The portfolio is about 70% exposed to growth stocks and 50% exposed to defensive companies.

#### **DNCA INVEST - GLOBAL ALPHA**

#### First-half 2020 recap

The positive momentum in economic growth seen in late 2019 was brought to a sudden halt by the global spread of Covid-19. Social distancing measures triggered a very steep drop in economic activity and an almost total halt to sectors such as tourism and recreation, and severely disrupted global trade. Against this backdrop, global GDP could contract on a full-year basis for the first time since 2009. Central banks reacted quickly and aggressively to this downgraded environment by slashing their key rates, pumping liquidity into the financial markets and expanding their quantitative easing programmes. Governments joined them in combatting this tough situation, raising considerable resources to mitigate the decline in consumer income and assist distressed companies, with the goal of restarting economic activity in the future. As of the end of the first half, the economic slowdown appeared to have bottomed out, but the recovery is likely to be tentative, as the ongoing spread of Covid-19 in many countries is throwing up a powerful hurdle to an across-the-board recovery.

Against this backdrop, the financial markets recovered strongly after having initially taken a big hit, particularly the equity markets, which were driven by skyrocketing "tech" stocks, which were hit less hard than traditional stocks, and by abundant, low-cost liquidity.

On the first half of the year, DNCA INVEST - GLOBAL ALPHA turned in the following performances:

- I Shares (EUR): -8.68%

- A Shares (EUR): -8.99%

- B Shares (EUR): -9.05%
- N Shares (EUR): -8.79%
- Q Shares (EUR): -8.51%

Against +1.04% for its benchmark index, EONIA +2.5%.

#### Past performances are not a reliable indicator of future performances.

The sudden drop in economic activity undermined the performance of the sub-fund, which was positioned mainly towards rising equity markets and inflation breakeven points. The sub-fund later took advantage of the equity market rebound to initiate short positions, particularly in the US, as valuations became excessive.

As of 30 June 2020, the portfolio's cash holdings (including money-market funds) stood at +27.92%, and its net asset value at 47.5 million euros.

#### Second-half outlook

On the macroeconomic front, we remain very cautious on prospects for a robust recovery in the second half of the year and thereafter, as several drivers of growth don't appear to be working. For example, household consumption is likely to be hindered by rising unemployment rates; business investment remains weak amidst the prevailing uncertainty; and foreign trade continues to be dragged down by social distancing measures in many countries not to mention the Sino-US trade war. Regarding our strategy, we continue to overweight inflation-linked bonds, which feature the risk-reward profile that is most suited to the current market environment. We are keeping our exposure in negative territory, due to excessive US market valuations. The currency driver is likely to be used more. We sold currencies of the hardest hit countries by Covid-19 (such as South Africa and Brazil), which have probably been weakened for a long time to come.

## **Directors' Report (continued)**

#### **DNCA INVEST - BEYOND CLIMATE\***

As the sub-fund was launched in April 2020, the data available is insufficient to present a proper review of its performance.

\*For further information regarding the investment process and the Socially Responsible Investment approach applicable to this sub-fund please refer to section "Our responsible investor philosophy and SRI management" on page 148

#### CHANGES MADE DURING THE FIRST HALF

A new version of the prospectus dated April 2020 contained the following changes:

The following changes were made:

- Creation of a new sub-fund, DNCA INVEST BEYOND CLIMATE, launched on 15 April 2020
- Creation of a WI share class (EUR) for the DNCA INVEST ALPHA BONDS sub-fund to address the German market
- Creation of a H-I share class (USD) for the DNCA INVEST GLOBAL ALPHA (FDG: 1.00%) sub-fund to address the Swiss market
- Reduction in management fees of A share class in the Beyond Infrastructure & Transition sub-fund from 2.00% to 1.80%
- Elimination of the following share classes, which had not been launched or that have been fully redeemed:
  - DNCA INVEST BEYOND EUROPEAN BOND OPPORTUNITIES: ND (EUR)
    - DNCA INVEST EUROSE: H-AD (USD), H-AD (SGD)
    - DNCA INVEST EVOLUTIF: BD (EUR), ND (EUR)
    - DNCA INVEST SOUTH EUROPE OPPORTUNITIES: H-I (USD), ID (EUR), AD (EUR)
    - DNCA INVEST VALUE EUROPE: H-A (SGD), N (GBP), H-N (GBP), I (GBP), H-I (GBP)
    - DNCA INVEST CONVERTIBLES: I (CHF), ND (EUR)
  - DNCA INVEST MIURI: IG (EUR), ND (EUR), NG (EUR), N (GBP), H-N (GBP), I (GBP), H-I (GBP)
    - DNCA INVEST EUROPE GROWTH: N (GBP), H-N (GBP), I (GBP), H-I (GBP)
- Inclusion of an additional paragraph dealing with fund management's independence with regard to benchmarks (the Benchmark Regulation), which is also
  mentioned in the KIID of each unit since 17 February
- Updating of the clause pertaining to AML/FT

Merger of the following share classes (between sub-funds):

Absorbed share classes	Absorbing share classes
DNCA INVEST - EUROSE I (CHF) – LU0765621130	DNCA INVEST - EUROSE (EUR) – LU1278537540
DNCA INVEST - SERENITE PLUS ID (EUR) – LU1490785687	DNCA INVEST - SERENITE PLUS I (EUR) – LU1526313082
DNCA INVEST - VALUE EUROPE ND (EUR) – LU1234713771	DNCA INVEST - VALUE EUROPE N (EUR) – LU1234713698

#### CHANGES TO COME

A new prospectus dated as of August 2020 is awaiting approval from the CSSF.

#### SPECIAL DISCLOSURES

#### For French investors:

Sub-funds eligible for the French shareholder savings plan (PEA):

- DNCA INVEST - BEYOND INFRASTRUCTURES & TRANSITION

As of 30 June 2020, 91.05% of the sub-fund's net assets were invested in securities eligible for the French shareholder savings plan (PEA). - DNCA INVEST - VALUE EUROPE

As of 30 June 2020, 86.06% of the sub-fund's net assets were invested in securities eligible for the French shareholder savings plan (PEA). - DNCA INVEST - SOUTH EUROPE OPPORTUNITIES

As of 30 June 2020, 96.43% of the sub-fund's net assets were invested in securities eligible for the French shareholder savings plan (PEA). - DNCA INVEST - EUROPE GROWTH

As of 30 June 2020, 79.76% of the sub-fund's net assets were invested in securities eligible for the French shareholder savings plan (PEA). - DNCA INVEST - ARCHER MID-CAP EUROPE

As of 30 June 2020, 82.41% of the sub-fund's net assets were invested in securities eligible for the French shareholder savings plan (PEA). - DNCA INVEST - NORDEN EUROPE

As of 30 June 2020, 79.26% of the sub-fund's net assets were invested in securities eligible for the French shareholder savings plan (PEA). - DNCA INVEST - VENASQUO

As of 30 June 2020, 85.79% of the sub-fund's net assets were invested in securities eligible for the French shareholder savings plan (PEA). - DNCA INVEST - BEYOND SEMPEROSA

As of 30 June 2020, 76.47% of the sub-fund's net assets were invested in securities eligible for the French shareholder savings plan (PEA).

#### Notes to the Financial Statements as at June 30, 2020

#### Note 1. General information

DNCA INVEST (the "Fund") is registered under part I of the Luxembourg Law of December 17, 2010 on undertakings for collective investment in transferable securities (UCITS) as amended (the "2010 Law").

The Fund was incorporated on February 12, 2007 under the Law of July 19, 1991 relating to undertakings for collective investment. From February 13, 2007 to August 31, 2007, the Fund was organised under the Law of February 13, 2007 relating to specialised investment funds as amended.

The extraordinary general meeting of the Shareholders held on August 31, 2007 has decided to amend the articles of incorporation in order to submit the Fund to the Luxembourg Law of December 20, 2002. Since July 1, 2011, the fund is subject to the 2010 Law on undertakings for collective investment, as amended and to change the name of the Fund from LEONARDO INVEST FUND into LEONARDO INVEST. The Board of Directors of the Fund decided to change the name of the Fund from LEONARDO INVEST to DNCA INVEST through a Circular Resolution dated January 20, 2011. The "Statuts Coordonnés" were amended on January 20, 2011. The Articles of Incorporation have been amended for the last time on June 5, 2019 and were published in the *Recueil Electronique des Sociétés et Associations* (RESA), on July 8, 2019.

DNCA INVEST is an open-ended collective investment company ("Société d'investissement à capital variable") established under the laws of Grand Duchy of Luxembourg for an unlimited period, with an "umbrella" structure comprising different Sub-Funds and Classes.

The Board of Directors of the Fund held on August 31, 2007, has designated Leonardo Asset Management to act as the Fund's Management Company under Chapter 13 of the amended Law of December 20, 2002 as of August 31, 2007 for an unlimited period (subsequently, the amended Law of December 17, 2010, and the Management Company is now governed by Chapter 15). Further to the Board Meeting held on January 20, 2011, the name of the Management Company has changed from Leonardo Asset Management to DNCA Finance Luxembourg. Effective date July 12, 2016 the Management Company DNCA Finance Luxembourg has been transferred from "25, rue Philippe II, L-2340 Luxembourg" to "1, place d'Armes, L-1136 Luxembourg".

As at June 30, 2020, the Fund has the following Sub-Funds in operation:

- DNCA INVEST BEYOND EUROPEAN BOND OPPORTUNITIES
- DNCA INVEST EUROSE
- DNCA INVEST EVOLUTIF
- DNCA INVEST SOUTH EUROPE OPPORTUNITIES
- DNCA INVEST VALUE EUROPE
- DNCA INVEST BEYOND INFRASTRUCTURE & TRANSITION
- DNCA INVEST BEYOND GLOBAL LEADERS
- DNCA INVEST CONVERTIBLES
- DNCA INVEST MIURI
- DNCA INVEST EUROPE GROWTH
- DNCA INVEST ARCHER MID-CAP EUROPE
- DNCA INVEST NORDEN EUROPE
- DNCA INVEST SERENITE PLUS
- DNCA INVEST VENASQUO
- DNCA INVEST GLOBAL CONVERTIBLES
- DNCA INVEST ALPHA BONDS
- DNCA INVEST FLEX INFLATION
- DNCA INVEST BEYOND ALTEROSA
- DNCA INVEST BEYOND SEMPEROSA
- DNCA INVEST GLOBAL ALPHA
- DNCA INVEST BEYOND CLIMATE (the Sub-Fund was launched on April 15, 2020)

As at June 30, 2020, the following Share classes are open to investors:

Classes A and B Shares are available to all investors.

Classes I, SI, WI and F Shares are only available to institutional investors.

Classes A, AG, B, BG, I, IG, SI, WI, F, N and Q Shares may be hedged. In such circumstances, the Shares will be referred by adding one "H" to the name of the class of Shares.

Class A, AG, B, BG, I, IG, SI, WI, F, N, NG and Q Shares may be available in a currency (the "Class Currency") other than the reference currency of the Sub-Fund (the "Reference Currency"). Such Class Currencies may be CHF, EUR or USD.

Class N Shares are only available to certain financial intermediaries selected by the Management Company. Due to the nature of services supplied, such financial intermediaries are not allowed to receive remuneration from the Management Company. They have also signed specific fee agreements with their clients.

Class Q Shares are only available to employees, managers or managing agents of the Investment Manager or its subsidiaries and branches as well as, subject to the approval of the Board of Directors of the Fund, to their relatives.

Under the Articles of Incorporation, the Board of Directors of the Fund may decide to issue, in respect of each Class, dividend Shares and/or capitalisation Shares.

Class AD, BD, ID and ND Shares are distribution Shares. Interim dividends may be distributed to the Shareholders of Classes, AD, BD, ID and ND Shares twice a year upon decision of the Board of Directors of the Fund.

#### Notes to the Financial Statements as at June 30, 2020 (continued)

#### Note 1. General information (continued)

Class AG, BG, IG and NG Shares are only available to specific distributors selected by the Management Company.

Classes A, AD, B, BG, F, H-A, H-I, I, ID, IG, N, ND, Q and SI Shares are in circulation.

#### Note 2. Significant accounting policies

The financial statements of the Fund are presented in accordance with Luxembourg regulations relating to undertakings for collective investment in transferable securities. They are prepared in accordance with generally accepted accounting policies in Luxembourg.

#### 2.1 Combined financial statements

The combined financial statements of DNCA INVEST are expressed in euro and are equal to the sum of the corresponding in the financial statements of each Sub-Fund converted into euro at the exchange rate prevailing at the end of the financial period.

#### 2.2 Valuation rules

The value of the following assets is determined as follows:

a) The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received is deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as may be considered appropriate in such case to reflect the true value thereof validated by the Board of Directors of the Fund.

b) The value of securities and/or financial derivative instruments, which are listed or dealt in on any stock exchange, is based on the last available price on the stock exchange, which is normally the principal market for such assets.

c) The value of assets dealt in any other Regulated Market is based on the last available price.

d) In the event that any assets are not listed or dealt in on any stock exchange or on any other Regulated Market, or if, with respect to assets listed or dealt in on any stock exchange, or other Regulated Market as aforesaid, the price as determined pursuant to sub-paragraph (b) or (c) is not representative of the fair market value of the relevant assets, the value of such assets are based on the reasonably foreseeable sales price determined prudently and in good faith validated by the Board of Directors of the Fund.

e) The liquidating value of options contracts not traded on stock exchanges or on other Regulated Markets means their net liquidating value determined, pursuant to the policies established by the Board of Directors of the Fund, on a basis consistently applied for each different variety of contracts. The liquidating value of futures, forward or options contracts traded on exchanges or on other Regulated Markets is based upon the last available closing or settlement prices of these contracts on exchanges and Regulated Markets on which the particular futures, forward or options contracts are traded by the Fund; provided that if a futures, forward or options contract cannot be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract shall be such value as the Board of Directors of the Fund may deem fair and reasonable.

f) Investments in UCITS and other UCIs are taken at their latest official net asset values or their latest unofficial net asset values (i.e. which are not generally used for the purposes of subscription and redemption of shares of the target funds) as provided by the relevant administrators if more recent than their official net asset values and for which the Administrative Agent has sufficient assurance that the valuation method used by the relevant administrator for said unofficial net asset values is coherent as compared to the official one.

If events have occurred which may have resulted in a material change of the net asset value of such shares or units of UCITS and/or other UCI since the day on which the latest official net asset value was calculated, the value of such shares or units may be adjusted in order to reflect, in the reasonable opinion of the Board of Directors, such change of value.

g) Non-listed money market instruments held by the Fund with a remaining maturity of ninety days or less are valued at the amortised cost method which approximates market value.

h) All other securities and other assets are valued at fair market value as determined in good faith pursuant to the procedures established by the Board of Directors of the Fund.

i) Contracts for Difference ("CFD") are over-the-counter financial instruments which allow an investor to take advantage of the share price movements without having to hold such shares or to manage the holding constraints (custody, financing, loan for shorts). Indeed, a "CFD" is a contract entered into between two parties to exchange, at the end of this contract, the difference between the opening and the closing prices of the contract, multiplied by the number of units of the underlying asset as specified in the contract. The settlement of these differences is completed through a cash payment, not through a physical delivery of the underlying assets. Contracts for Difference are valued at their market value according to the closing price of the underlying securities on the valuation day. The market value of the corresponding line indicates the difference between the market value and the strike price of the underlying securities. Net realised gain or (loss) and net change in unrealised appreciation) or (depreciation) on CFD are recorded in the Statement of Operations and Changes in Net Assets. The net unrealised appreciation or (depreciation) are recorded in the Statement of Net Assets. The valuation of a CFD shall reflect at all times the difference between the latest known price of the underlying security and the valuation that was taken into account when determining the transactions. Realised gain or (loss) and the Changes in unrealised appreciation or (depreciation) are included in the Statement of Operations and Changes in Net Assets.

#### Notes to the Financial Statements as at June 30, 2020 (continued)

#### 2.2 Valuation rules (continued)

j) Futures contracts are valued based on the last available market price. Net realised gain or (loss) and net change in unrealised appreciation or (depreciation) on futures contracts are included in the Statement of Operations and Changes in Net Assets. The net unrealised appreciation or (depreciation) are recorded in the Statement of Net Assets. For the calculation of net holdings by currency on financial instruments, the holdings are converted at the exchange rate prevailing at the period-end.

k) The forward foreign exchange contracts represent obligations of purchase or the sale of foreign currency on the basis of future exchange rates determined at a fixed price at the time of conclusion of the contracts. The unexpired forward foreign exchange contracts are valued at the last "forward" rate available on the valuation dates or at the balance sheet date and unrealised appreciation or (depreciation) are recorded. Realised gain or (loss) and the Changes in unrealised appreciation or (depreciation) are included in the Statement of Operations and Changes in Net Assets. The net unrealised appreciation or (depreciation) are recorded in the Statement of Net Assets.

I) Interest rate swaps contracts and Inflation linked swaps contracts are bilateral agreements in which each party agrees to exchange a series of interest payments for another series of interest payments on the basis of a notional amount serving as the basis of calculation that is generally not exchanged.

Interest rate swaps contracts and Inflation linked swaps contracts are valued at their last known closing price of the underlying security. Net realised gain or (loss) and change in unrealised appreciation or (depreciation) are included in the Statement of Operations and Changes in Net Assets under caption Net realised gain or (loss) on options contracts and swaps contracts and Net change in unrealised appreciation) or (depreciation) or options contracts and swaps contracts.

The net realised gain or (loss) and net change in unrealised appreciation or (depreciation) on Interest rate swaps and Inflation linked swaps contracts are included in the Statement of Operations and Changes in Net Assets under the caption swaps contracts. The net unrealised appreciation or (depreciation) are recorded in the Statement of Net Assets.

#### 2.3 Foreign currency translation

The accounts of each Sub-Fund of the Fund are denominated in the currency in which its net asset value is calculated.

The cost of investments denominated in currencies other than the Sub-Fund's accounting currency is converted into that currency at the exchange rate prevailing at the purchase date.

Income and expenses in currencies other than the Sub-Fund's accounting currency are converted into that currency at the exchange rate prevailing at the transaction date.

The foreign exchange gains and losses on investments are included in the net realised gain or (loss) on investments, in the Statement of Operations and Changes in Net Assets.

At the end of the period, the investments' market value (determined as noted previously), the receivables, cash at banks and liabilities denominated in currencies other than the Sub-Fund's accounting currency are converted into that currency at the exchange rates prevailing at that date. The net realised gain or (loss) and net change in unrealised appreciation or (depreciation) on foreign currencies transactions are included in the Statement of Operations and Changes in Net Assets.

#### 2.4 Net realised gain or (loss) on investments

The net realised gain or (loss) on sales of investments is calculated on an average cost basis and is included in the Statement of Operations and Changes in Net Assets.

#### 2.5 Expenses

Interest expenses are accounted for on accrual basis. Expenses are included in the Statement of Operations and Changes in Net Assets.

#### 2.6 Dividends and interests

Dividends and interest received or paid by the Fund on its investments are in many cases subject to recoverable withholding taxes at source. The value of any dividends and interest declared or accrued as aforesaid and not yet received or paid is deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full. Dividends are recognised as income net of withholding tax on the date the securities are first quoted ex-dividend to the extent the information is reasonably available to the Fund. Interest is accrued at each net asset valuation.

#### 2.7 Transaction costs

The Fund incurred transaction costs which have been defined as brokerage fees, certain taxes and certain depositary fees relating to the purchase and sale of transferable securities, money market instruments or other eligible assets. The global amounts of transaction costs are all taken into account through the Statement of Operations and Changes in Net Assets.

#### Notes to the Financial Statements as at June 30, 2020 (continued)

#### Note 4. Management fees and performance fees (continued)

DNCA INVEST - BEYOND EUROPEAN BOND OPPORTUNITIES: The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance of the FTSE MTS Global Index with High Water Mark. The High Water Mark is the Net Asset Value per Share at the last Valuation Day of any performance period where a performance fee has been paid or failing that, the initial offer price per Share for unlaunched Classes. In order to calculate daily the performance for each Class, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions multiplied by the FTSE MTS Global Index. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 20% of the positive performance net of any fees above FTSE MTS Global Index with High Water Mark. The performance period is the period running from 1 January to 31 December each year.

DNCA INVEST - EUROSE: This Sub-Fund is not subject to receive performance fee.

DNCA INVEST - EVOLUTIF: The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance of the following composite index net return: 60% Eurostoxx 50, 30% FTSE MTS EMU GOV BOND 1-3 Years and 10% EONIA with High Water Mark. The High Water Mark is the Net Asset Value per Share at the last Valuation Day of any performance period where a performance fee has been paid or failing that, the initial offer price per Share for unlaunched Classes. In order to calculate daily the performance for each Class, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions multiplied by the composite Index. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 20% (none for the Class Q Shares EUR) of the positive performance net of any fees above the composite Index with High Water Mark. The performance period is the period running from 1 January to 31 December each year.

DNCA INVEST - SOUTH EUROPE OPPORTUNITIES: The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance of the following composite index net return: 55% FTSE MIB; 40% IBEX; 5% PSI20 with High Water Mark. The High Water Mark is the Net Asset Value per Share at the last Valuation Day of any performance period where a performance fee has been paid or failing that, the initial offer price per Share for unlaunched Classes. In order to calculate daily the performance for each Class, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions multiplied by the composite Index. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 20% of the positive performance net of any fees above the composite Index with High Water Mark. The performance period is the period running from 1 January to 31 December each year.

**DNCA INVEST - VALUE EUROPE:** The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance of the STOXX EUROPE 600 Index Net Return with High Water Mark. The High Water Mark is the Net Asset Value per Share at the last Valuation Day of any performance period where a performance fee has been paid or failing that, the initial offer price per Share for unlaunched Classes. In order to calculate daily the performance for each Class, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions multiplied by the STOXX EUROPE 600 Index Net Return. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 20% (none for the classes Q Shares EUR and H-SI Shares USD) of the positive performance net of any fees above the STOXX EUROPE 600 Index Net Return with High Water Mark. The performance period is the period running from 1 January to 31 December each year.

DNCA INVEST - BEYOND INFRASTRUCTURE & TRANSITION: The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance of the MSCI Europe Infrastructure Net Index with High Water Mark. The High Water Mark is the Net Asset Value per Share at the last Valuation Date of any performance period where a performance fee has been paid or failing that, the initial offer price per Share for unlaunched Classes. In order to calculate daily the performance for each Class, the total net asset value before performance fee is compared to the Reference Asset Value. The daily reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day plus additional subscriptions and minus redemptions multiplied by the MSCI Europe Infrastructure Net Index. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 20% of the positive performance net of any fees above the MSCI Europe Infrastructure Net Index with High with Water Mark. The performance period is the period running from 1 January to 31 December each year.

DNCA INVEST - BEYOND GLOBAL LEADERS: The Investment Manager is entitled to a performance fee calculated daily on the outperformance of the Sub-Fund compared to the performance of the MSCI All Countries World Index Net Return (MSCI ACWI NR Index). In order to calculate daily the performance of each Class, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation day plus additional subscriptions and minus redemptions multiplied by the composite index described above. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 10% (5% for Share class Q Shares (EUR)) of the positive performance net of any fees above the MSCI All Countries World Index Net Return. The performance period is the period running from 1 January to 31 December each year.

#### Notes to the Financial Statements as at June 30, 2020 (continued)

#### Note 4. Management fees and performance fees (continued)

**DNCA INVEST** - **CONVERTIBLES:** The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance, net of any fees, of the Exane Euro Convertibles Index with High Water Mark. The High Water Mark is the Net Asset Value per Share at the last Valuation Date of any performance period where a performance fee has been paid or failing that, the initial offer price per Share for unlaunched Classes and the Net Asset Value per Share at the last Valuation Day of December 2015 for any other Class and for the first performance period. In order to calculate daily the performance for each Class, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day (and for the first performance period as of the last Valuation Day of December 2015), plus additional subscriptions and minus redemptions, multiplied by the Exane Euro Convertibles Index. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 15% of the positive performance net of any fees above the Exane Euro Convertibles Index with High Water Mark. The performance period is the period running from 1 January to 31 December each year.

**DNCA INVEST - MIURI:** The Investment Manager is entitled to a performance fee calculated daily on the performance of the Sub-Fund compared to the performance of the EONIA Index. In order to calculate daily the performance, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions multiplied by the EONIA Index. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 20% (none for Share class Q Shares (EUR)) of the positive performance net of any fees above the EONIA Index. The performance period is the period running from 1 January to 31 December each year.

**DNCA INVEST - EUROPE GROWTH:** The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance of the STOXX EUROPE 600 Net Return (NR) Index. In order to calculate daily the performance, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions multiplied by the STOXX EUROPE 600 (Net Return Index). In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 20% (none for the Class Q Shares EUR) of the positive performance net of any fees above the STOXX EUROPE 600 (Net Return Index). The performance period is the period running from 1 January to 31 December each year.

DNCA INVEST - ARCHER MID-CAP EUROPE: The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance of the MSCI EUROPE MID CAP Net Return Euro Index. In order to calculate daily the performance, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions multiplied by MSCI EUROPE MID CAP Net Return Euro Index. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 20% (none for the Share class Q Shares (EUR)) of the positive performance net of any fees above the MSCI EUROPE MID CAP Net Return Euro Index. The performance period is the period running from 1 January to 31 December each year.

DNCA INVEST - NORDEN EUROPE: The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance of the following composite net return index denominated in Euro: 40% MSCI Nordic, 35% DAX, 15% SMI, 10% MSCI UK TR UK Net Local Currency. In order to calculate daily the performance, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day (and for the first performance period as of the first Valuation Day), plus additional subscriptions and minus redemptions multiplied by the composite Index. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 20% (none for Share class Q Shares (EUR)) of the positive performance net of any fees above the composite index. The performance period is the period running from 1 January to 31 December each year.

**DNCA INVEST - SERENITE PLUS:** The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance of the FTSE MTS Index 1-3 years. In order to calculate daily the performance, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day (and for the first performance period as of the first Valuation Day), plus additional subscriptions and minus redemptions multiplied by the FTSE MTS Index 1-3 years. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 20% of the positive performance net of any fees above the Index. The performance period is the period running from 1 January to 31 December each year.

#### Notes to the Financial Statements as at June 30, 2020 (continued)

#### Note 4. Management fees and performance fees (continued)

DNCA INVEST - VENASQUO: The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance of following composite index net return: 50% EONIA + 50% EUROSTOXX 50. In order to calculate daily the performance, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions multiplied by the composite Index. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 20% (none for class Q Shares EUR) of the positive performance net of any fees above the composite index. The performance period is the period running from 1 January to 31 December each year.

DNCA INVEST - GLOBAL CONVERTIBLES: The Investment Manager is be entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance, net of any fees, of the UBS Thomson Reuters Global Focus Vanilla Hedged (EUR) CB Index with High Water Mark. The High Water Mark is the Net Asset Value per Share at the last Valuation Day of any performance period where a performance fee has been paid or failing that, the initial offer price per Share for unlaunched Classes and the Net Asset Value per Share at the last Valuation Day of December of the relevant year for any other Class and for the first performance period. In order to calculate daily the performance for each Class, the total net asset value before performance fee is compared to the Reference Asset Value as defined below. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions, multiplied by the UBS Thomson Reuters Global Focus Vanilla Hedged (EUR) CB Index. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 15% (5% for class Q Shares EUR) of the positive performance net of any fees above the UBS Thomson Reuters Global Focus Vanilla Hedged (EUR) CB Index with High Water Mark. The performance period is the period running from 1 January to 31 December each year.

**DNCA INVEST - ALPHA BONDS:** The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance, net of any fees, of the EONIA Index +2.5% with High Water Mark. The High Water Mark is the Net Asset Value per Share at the last Valuation Date of any performance period where a performance fee has been paid or failing that, the initial offer price per Share for unlaunched Classes. In order to calculate daily the performance for each Class, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions and any distributed dividend, multiplied by the EONIA index +2.5%. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly only in case of positive performance at the end of relevant performance period and if the Net Asset Value as of the last Valuation Day of the relevant performance period would not fall below the Net Asset Value as of the first Valuation Day of this performance period.

The performance fee is equal to 20% (none for class Q and WI Shares EUR) of the positive performance net of any fees above the EONIA index + 2.5% with High Water Mark. The performance period is the period running from 1 January to 31 December each year.

**DNCA INVEST - FLEX INFLATION:** The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance, net of any fees, of the Bloomberg Barclays World Govt Inflation Linked Bonds Hedged EUR with High Water Mark. The High Water Mark is the Net Asset Value per Share at the last Valuation Date of any performance period where a performance fee has been paid or failing that, the initial offer price per Share for unlaunched Classes. In order to calculate daily the performance for each Class, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions and any distributed dividend, multiplied by the Bloomberg Barclays World Govt Inflation Linked Bonds Hedged EUR. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly only in case of positive performance at the end of relevant performance period and if the Net Asset Value as of the last Valuation Day of this performance period.

The performance fee is equal to 20% (none for class Q Shares EUR) of the positive performance net of any fees above the Bloomberg Barclays World Govt Inflation Linked Bonds Hedged EUR with High Water Mark. The performance period is the period running from 1 January to 31 December each year.

DNCA INVEST - BEYOND ALTEROSA: This Sub-Fund is not subject to performance fee.

DNCA INVEST - BEYOND SEMPEROSA: The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance, net of any fees, of the EURO STOXX Net Return. The High Water Mark is the Net Asset Value per Share at the last Valuation Date of any performance period where a performance fee has been paid or failing that, the initial offer price per Share for unlaunched Classes. In order to calculate daily the performance, the total net asset value before performance fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions multiplied by the EURO STOXX Net Return. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly only in case of positive performance at the end of relevant performance period and if the Net Asset Value per share as of the relevant performance period would not fall below the Net Asset Value per share as of the first Valuation Day of this performance period.

The performance fee is equal to 20% (none for class Q Shares EUR) of the positive performance net of any fees above the EURO STOXX Net Return with High Water Mark. The performance period is the period running from 1 January to 31 December each year.

#### Notes to the Financial Statements as at June 30, 2020 (continued)

#### Note 4. Management fees and performance fees (continued)

**DNCA INVEST - GLOBAL ALPHA:** The Investment Manager will be entitled to a Performance Fee calculated daily on the positive performance of the Sub-Fund compared to the performance, net of any fees, of the EONIA Index +2.5% with High Water Mark. The High Water Mark is the Net Asset Value per Share at the last Valuation Date of any performance period where a performance fee has been paid or failing that, the initial offer price per Share for unlaunched Classes. In order to calculate daily the performance for each Class, the total net asset value before Performance Fee is compared to the Reference Asset Value. The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions and any distributed dividend, multiplied by the EONIA Index + 2.5%. In case of redemptions, corresponding Performance Fee (if any) will be crystallised. The Performance Fee is paid yearly only in case of positive performance at the end of relevant performance period and if the Net Asset Value as of the last Valuation Day of the relevant performance period would not fall below the Net Asset Value as of the first Valuation Day of this performance period.

The performance fee is equal to 20% (none for class Q Shares EUR) of the positive performance net of any fees above the 20% of the positive performance net of any fees above the EONIA Index + 2.5% with High Water Mark. The performance period is the period running from 1 January to 31 December each year.

DNCA INVEST - BEYOND CLIMATE\*: The Investment Manager is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance of the Euro Stoxx Net Return. The High Water Mark is the Net Asset Value per Share at the last Valuation Date of any performance period where a performance fee has been paid or failing that, the initial offer price per Share for unlaunched Classes. In order to calculate daily the performance for each Class, the total net asset value before performance fee is compared to the Reference Asset Value. The daily reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day plus additional subscriptions and minus redemptions and any distributed dividend, multiplied by the Euro Stoxx Net Return. In case of redemptions, corresponding performance fee (if any) will be crystallised. The performance fee is paid yearly.

The performance fee is equal to 20% of the positive performance net of any fees above the index with High with Water Mark. The performance period is the period running from 1 January to 31 December each year.

#### Note 5. Depositary and administration fees

The Board of Directors of the Fund has appointed BNP Paribas Securities Services - Luxembourg Branch as depositary, administrative agent, depositary agent, domiciliary agent, principal paying agent, registrar and transfer agent of the Fund.

The Fund pays to the Depositary a depositary fee which shall not exceed 0.08 % of the Net Asset Value of the Fund. The depositary fee is paid monthly. The Fund pays to the Principal Transfer Agent and Administrative Agent an Administrative fee which shall not exceed 0.07% of the average Net Asset Value of the Fund. The administration fee is paid monthly.

#### Note 6. Taxe d'abonnement

Under current law and practice, the Fund is not liable to any Luxembourg income tax, nor are dividends paid by the Fund liable to any Luxembourg withholding tax.

During the period, the Fund is liable to a subscription tax ("taxe d'abonnement") at a rate of 0.05% per annum on the Net Asset Value of each class which is available to all investors. This tax is reduced to 0.01% per annum of the Net Asset Value of each class which is restricted to institutional investors.

The "taxe d'abonnement" is not applicable in respect of assets invested in Luxembourg UCIs, which are themselves subject to such tax. No stamp duty or other tax is payable in Luxembourg on the issue of shares in the Fund.

The tax is payable quarterly on the basis of the value of the net assets of the Fund at the end of the relevant quarter.

#### Note 7. Professional fees and other expenses

The caption "Professional fees" include mainly legal fees, audit fees and compliance fees. The caption "Other expenses" is mainly composed of VAT (Value-Added Tax), regulatory fees and Alfi.

#### Note 8. Changes in portfolio statement

The report on the changes in the portfolio statement during the period is available upon request and free of charges at the registered office of the Fund.

#### Note 9. Cross Sub-Funds investment (art. 181 of the amended Law of December 17, 2010)

Cross Sub-Funds investment envisages that any Sub-Fund created within an undertaking for collective investment (UCI) with multiple Sub-Funds may invest in one or more other Sub-Funds of the same UCI. This allows a single legal structure with cross Sub-Funds investment to subscribe for, acquire and hold within the same UCI.

During the period ended June 30, 2020, the following cross Sub-Funds investments were processed:

- DNCA INVEST - EUROSE** invests in:	- DNCA INVEST - ALPHA BONDS - CLASS I SHARES EUR
	- DNCA INVEST - ARCHER MID-CAP EUROPE - CLASS N SHARES EUR

\*Please see note 1.

\*\*For the period ended on June 30, 2020, no duplication of subscription or redemption fees exists in the Sub-Funds.

#### Notes to the Financial Statements as at June 30, 2020 (continued)

No significative events have occurred during the period ended June 30, 2020.

#### Additional information

#### Portfolio Turnover Ratio ("PTR")

The PTR of each Sub-Fund as at June 30, 2020 is given below:

Sub-Funds	PTR in %
DNCA INVEST - BEYOND EUROPEAN BOND OPPORTUNITIES	9.12
DNCA INVEST - EUROSE	10.39
DNCA INVEST - EVOLUTIF	187.37
DNCA INVEST - SOUTH EUROPE OPPORTUNITIES	11.66
DNCA INVEST - VALUE EUROPE	44.13
DNCA INVEST - BEYOND INFRASTRUCTURE & TRANSITION	27.10
DNCA INVEST - BEYOND GLOBAL LEADERS	14.10
DNCA INVEST - CONVERTIBLES	60.79
DNCA INVEST - MIURI	85.29
DNCA INVEST - EUROPE GROWTH	8.93
DNCA INVEST - ARCHER MID-CAP EUROPE	123.63
DNCA INVEST - NORDEN EUROPE	14.40
DNCA INVEST - SERENITE PLUS	21.68
DNCA INVEST - VENASQUO	103.84
DNCA INVEST - GLOBAL CONVERTIBLES	50.33
DNCA INVEST - ALPHA BONDS	147.83
DNCA INVEST - FLEX INFLATION	90.11
DNCA INVEST - BEYOND ALTEROSA	31.46
DNCA INVEST - BEYOND SEMPEROSA	17.60
DNCA INVEST - GLOBAL ALPHA	62.58
DNCA INVEST - BEYOND CLIMATE*	(14.73)

\*Please see note 1.

The Portfolio Turnover Ratio (PTR), expressed as a percentage, reflects the volume of dealing in the Sub-Funds. It is equal to the total of purchases and sales of securities netted against the value of the subscriptions and redemptions, over the average net assets of the Sub-Fund for the year. The PTR is calculated according to the guidelines dated May 16, 2008 by the Swiss Funds & Asset Management Association ("SFAMA"). Portfolio turnover is not annualized for period less than one year.

#### Risk management disclosure

The risk-management process complies with the CSSF circular 11/512 and enables to monitor and measure at any time the risk of the positions and their contribution to the overall risk profile of each Sub-Fund.

The method used to calculate global exposure is the commitment approach for all Sub-Funds, except for the Sub-Funds below which are using the historical absolute value-at-risk approach ("VAR").

Sub-Funds Historical VAR (20 days, 99			days, 99%)	Realized leverage using the s sem	um of notional method du ester (in % of TNA)	uring the reference
	Min	Max	Average	Min	Max	Average
DNCA INVEST - ALPHA BONDS	1.66%	11.54%	5.20%	123.86%	433.16%	294.76%
DNCA INVEST - FLEX INFLATION	1.74%	14.66%	7.89%	279.25%	480.75%	355.11%
DNCA INVEST - GLOBAL ALPHA	1.90%	22.69%	7.72%	236.13%	602.69%	353.58%

#### Investment remuneration policy

The remuneration policy has also been further established to avoid any conflict of interests situations and prevent any risk-taking unconsidered or incompatible with the client's interests.

The remuneration policy is based on a annually and perennial, quantitative and qualitative performance criteria and skill assessment. The policy integrates in its fundamental principles the alignment of interests between DNCA Finance's investors and employees.

Information on the remuneration policy of DNCA Finance can be freely obtained in the company's website: www.dnca-investments.com or by simple request at the company's registered office.

## Additional information (continued)

#### Investment remuneration policy (continued)

The total remuneration amount granted by DNCA Finance and its subsidiaries to all its employees for the 2020 financial exercise will be available in the next annual report published by the end of April 2021.

#### Security Financing Transaction Regulation (SFTR)

The Fund did not engage in transactions which are the subject of EU Regulation No 2015/2365 on the transparency of securities financing transactions and of reuse. Accordingly, no global, concentration or transaction data, or information on the reuse or safekeeping of collateral is required to be reported.

#### Our Responsible Investor and SRI Management Philosophy

The socially responsible investment (SRI) doctrine is multifaceted and in constant flux", which sits at the crossroads of economic and social standards. SRI made a major shift in the 1990s from mainly based on ethical concerns towards an integration of the sustainable development concept. This is how the extra-financial ESG (Environment, Social and Governance) criteria were gradually worked into financial management, while being embraced by an informal framework that has now been regulated.

#### Our values:

DNCA Finance is an asset management firm established in 2000 by specialists of a wealth-management approach to managing assets on behalf of private and institutional investors. Over the years, the founders have brought together a team of experienced and renowned managers to develop a simple, easy-to-understand and high-performance range of funds around a conviction-based management approach. We make our investment choices on the basis of in-depth research into companies. Before investing, we review a company on a comprehensive basis in order to select those bonds and shares having the best risk-weighted performance potential. Naturally, the research and ongoing dialogue that we maintain with companies are informed by societal challenges. Our investments are turned resolutely towards long-term performance, which also reflects all risks and challenges that companies face. This is why governance has always been a decisive criterion, as it is now unthinkable to invest in a company without verifying the quality of its managers, the independence of its supervisory bodies, and the respect of its minority shareholder rights. We have gradually integrated social and environmental challenges into our approach, as we are convinced that they are relevant to our business of selecting tomorrow's winners. ESG criteria have accordingly been integrated into DNCA's strategies, as they complement financial research and create value.

#### Our conviction:

In 2017, DNCA Finance signed the United Nations Principles for Responsible Investment (UNPRI) to provide a structural framework to our approach and take part in local discussions in our capacity as an active and long-term investor. This highlighted our conviction that we are responsible managers to both our investor clients and to the companies that we finance. Our ambition is to offer a differentiating and innovative approach that evolves as new challenges arise. With this in mind, our socially responsible investment role distinguishes two concepts: corporate social responsibility (CSR) and the sustainable economic transition. These two dimensions are evaluated on the basis of an in-depth analysis of economic and social trends, as well as recognised expertise in SRI. Below, we detail the emergence of these two concepts and how we address them within an SRI management framework.

The investment process and the SRI approach presented below is applicable to the "BEYOND" range, with consists of the six subfunds of the DNCA Invest SICAV listed below:

- DNCA INVEST BEYOND EUROPEAN BOND OPPORTUNITIES
- DNCA INVEST BEYOND INFRASTRUCTURES & TRANSITION
- DNCA INVEST BEYOND GLOBAL LEADERS
- DNCA INVEST BEYOND ALTEROSA
- DNCA INVEST BEYOND SEMPEROSA
- DNCA INVEST BEYOND CLIMATE\*

\*Please see note 1.

#### **Corporate Social Responsibility**

#### Evaluating risks in all sectors:

While corporate social responsibility no longer offers real investment opportunities, it continues to play a whistleblowing role and is an excellent proxy for assessing the quality of corporate management, particularly in risk management. The many indicators in annual reports (e.g., the 49 basic indicators and 30 additional ones in the GRI benchmark) actually provide a second reading of companies' health. They are now comparable in absolute terms within a sector and, more importantly, over time. Trends in certain indicators offer additional datapoints that in many cases are not yet reflected in companies' financial statements. An abnormal increase in turnover, work-related accidents or absenteeism, for example could be signs that all is not right within a company or that labour relations have worsened to a point of undermining its competitiveness and economic performance (1% of absenteeism results in 1% additional payroll costs). With this in mind, we believe that corporate social responsibility is no longer an investment opportunity but a tremendous source of information in assessing risks that companies face, particularly in their interactions with their stakeholders, including employees, suppliers, customers, local communities, shareholders and others, regardless of their sector of activity.

#### The Sustainable Economic Transition

#### The 17 UN Sustainable Development Goals:

Our conviction is based on a long-term view of how the economy is financed. As a responsible asset manager, our role is to select companies offering the best strategic and economic advantages to meet tomorrow's challenges. We are convinced that these companies' ability to anticipate their market will be crucial for winning or retaining leadership. That is how we achieve robust outperformance in our portfolios, by identifying companies' exposure to the sustainable economic transition.

## Additional information (continued)

#### The Sustainable Economic Transition (continued)

#### Identifying investment opportunities

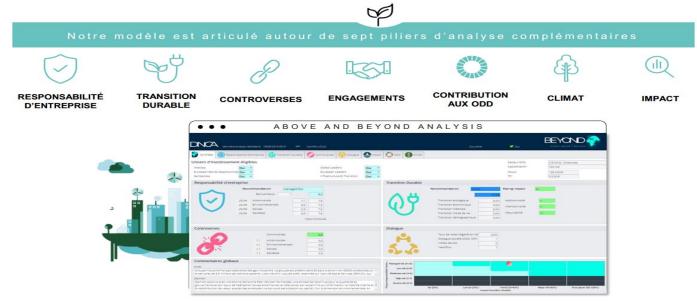

The sustainable economic transition is above all a source of investment opportunities. Our task is to identify those themes that are relevant to the sustainable economic transition and to select those companies that contribute to it. Our proprietary research model presented below is based on five major sustainable transition avenues and their material themes. We have agreed that each company's contribution to the sustainable transition will be assessed gradually based on its level of exposure, ranging from no exposure at all to pure player status. We revise our list of themes each year, based on ongoing shifts in societal trends. Our ambition is a pragmatic and innovative onein order to retain the most comprehensive understanding possible of the various performance drivers.

#### **Our ESG Research Model**

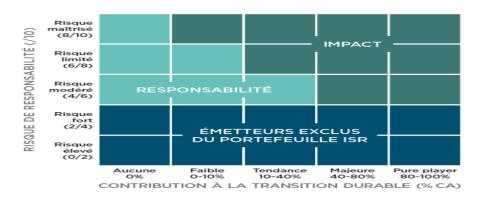

#### A proprietary rating model: Above and Beyond Analysis (ABA):

We pay special attention to the importance of developing proprietary models based on our expertise with the constant goal of providing tangible added value in selecting portfolio securities. DNCA Finance's ESG research model adheres to this principle and aims to offer a ratings system that we master from end to end. Most data used in our rating systemnts consists of disclosures from the companies themselves. Dialogue with managers and on-site visits reinforce our understanding of companies and offer an inestimable source of added value. Our model is based on seven independent and complementary research pillars: CORPORATE SOCIAL RESPONSIBILITY, THE SUSTAINABLE TRANSITION, CONTROVERSIES, DIALOGUE & ENGAGEMENT, SDG (Sustainable Development Goals), IMPACT INVESTING and CLIMATE.

Our objective is to provide a detailed analysis that adds value to traditional financial research. DNCA Finance teams conduct this analysis exclusively in-house, based mainly on disclosures from the companies themselves.

Our model combines the evaluation of identified investment risks via the Corporate Responsibility score, adjusted for the level of controversies, with an analysis of the company's positive contribution to the sustainable transition, via a Sustainable Transition score. Combining these two dimensions allows us to map out companies based on a risk/opportunities approach. Companies' disclosures and our conversations with them are factored into the model and constitute our database. Our analysis in our proprietary ABA tool is presented the following way:

All criteria analysed under the ABA ESG framework are described in our Sustainable Investor Policy: https://www.dnca-investments.com/SRI/Politique%20d%27investisseur%20responsable\_FR%2030%2010%2018.pdf

The SRI investment process is also described in detail in our Code of Transparency: https://www.dnca-investments.com/SRI/Code%20de%20transparence%20FR mai%202020.pdf
